COMPETENCY BASED CURRICULUM

MECHANIC CONSUMER ELECTRONIC APPLIANCES

(Duration: Two Years)

CRAFTSMEN TRAINING SCHEME (CTS)

NSQF LEVEL- 5

SECTOR –Electronics & Hardware

MECHANIC CONSUMER ELECTRONIC APPLIANCES

(Engineering Trade)

(Revised in 2018)

CRAFTSMEN TRAINING SCHEME (CTS)

NSQF LEVEL- 5

Developed By

Ministry of Skill Development and Entrepreneurship

Directorate General of Training
CENTRAL STAFF TRAINING AND RESEARCH INSTITUTE
EN-81, Sector-V, Salt Lake City,
Kolkata – 700 091

ACKNOWLEDGEMENT

The DGT sincerely express appreciation for the contribution of the Industry, State Directorate, Trade Experts, Academicians and all others who contributed in revising the curriculum. Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

S No.	Name & Designation Sh/Mr/Ms	Organization	Remarks
List of Expert Members contributed/ participated for finalizing the course curriculum of Mechanic Consumer Electronic Appliances on 16.05.2017 at I.T.I. AUNDH, PUNE, MAHARASHTRA			
1.	Dr. K C Vora, Sr. Dy. Director & Head ARAI Academy	The Automotive Research Association of India Kothrud, Pune	Chairman
2.	Jai Prakash, Dy Manager	Bharat Electronics Limited, Pune	Member
3.	Y. Raghvendhar, Dy Manager	Bharat Electronics Limited, Pune	Member
4.	Dipak Ghule, Sr. Engineer	Micro embedded Technologies, Pune	Member
5.	V. Ravi, C.E.O.	Anshuman Technologies Pvt. Ltd., Pune	Member
6.	N. Jagtap, Sr. Engineer	Anshuman Technologies Pvt. Ltd., Pune	Member
7.	Milind Dhule, Sr. Engineer	Scientech Technologies Pvt.Ltd., Ganesh Mala, Sinhgad Rd, Pune	Member
8.	Sachin Koravi, Sr. Engineer	Dynalog Didactic Solutions Pvt.Ltd., Narhe - Pune	Member
9.	Pravin S Deode, MD	Sap Engineers & Consultant, Pune	Member
10.	Amol Kadu, Sr. Engineer	Nvis Technologies Pvt .Ltd., Indore, Electronics Complex, Pardeshipura	Member
11.	Kunal Bondre, Sr. Engineer	Emerson Network Power (I) Pvt. Ltd.	Member
12.	Mr Amar Phagwani, Sr. Enginner	Blue Star Limited, Wada Dist Thane	Member
13.	Smt S.N. Murmade, Sr Engineer	IFB Ltd., Mumbai	Member
14.	Nissar Shaikh, Service Engineer	Samsung (I) Ltd., Mumbai	Member
15.	Sandeep Jadhav, Sr. Engineer	Emerson Network Power (I) Pvt. Ltd.	Member
16.	Sarfaraz Alam, Sr. Engineer	Emerson Network Power (I) Pvt. Ltd.	Member
17.	Nasir Ali Shaikh, Sr. Engineer	Emerson Network Power (I) Pvt. Ltd.	Member
18.	Uday Apte, Div. Manager (Trg.)	Tata Motors, Sanand, Gujarat	Member
19.	DK Sharma, MD	Technology Exchange, Ahmedabad	Member
20.	Amalendu Jana, Manager (Technical)	Tata Telecommunications, Kolkata	Member
21.	L.K. Mukherjee, Deputy Director	CSTARI, Kolkata	Member
22.	HN Bargal, Training Officer	DVET, Mumbai	Member
23.	PP Kodgilwar, Instructor	ITI, Malegaon	Member
24.	Madhuri Shinde, Instructor	ITI, Aundh, Pune	Member
25.	P Bairagi, Training Officer	CSTARI, Kolkata	Member

| 26. | Mrs Deblina Roy, Instructor | Don Bosco, Kolkata | Member |
| 27. | Mrs Keya Basu, Supervisor | ITI Tollygunge, Kolkata | Member |

MEMBERS OF SECTOR MENTOR COUNCIL

Mechanic Consumer Electronic Appliances

CONTENTS

During the two years duration of Electronics Mechanic trade, a candidate is trained on Professional Skill, Professional Knowledge, Engineering Drawing, Workshop Calculation & Science and Employability Skill. In addition to this, a candidate is entrusted to undertake project work and extracurricular activities to build up confidence. The broad components covered related to the trade are categorized in four semesters each of six months duration. The semester wise course coverage is categorized as below:

1st Semester – In this semester, the trainee learns about safety and environment, use of fire extinguishers, artificial respiratory resuscitation to begin with. He gets the idea of trade tools & its standardization, familiarize with basics of electricity, test the cable and measure the electrical parameter. Skilling practice on different types & combination of cells for operation and maintenance of batteries being done. Identify and test passive and active electronic components. Construct and test unregulated and regulated power supplies. Practice soldering and de-soldering of various types of electrical and electronic components on through-hole PCBs. Assemble a computer system, install OS, Practice with MS office. Use the internet, browse, create mail IDs, download desired data from internet using search engines.

2nd Semester – In this semester, the candidate will be able to construct and test amplifier, oscillator and wave shaping circuits. Testing of power electronic components. Construct and test power control circuits. Identify and test optoelectronic devices. Able to achieve the skill on SMD Soldering and De-soldering of discrete SMD components. Verifying the truth tables of various digital ICs by referring Data book. Practice circuit simulation software to simulate and test various circuits. Identify various types of LEDs, LED displays and interface them to a digital counter and test. Construct and test various circuits using linear ICs 741 & 555.

3rd Semester – In this semester, the trainee will be able to operate DSO and perform various functions like testing of signal Generator etc. Trainee will gain the skill by practicing SMD Soldering and De-soldering of various types of IC Packages. Able to identify the defects and do rework of PCB. Construct and test simple electrical control circuits and various electrical protective devices. Identify, prepare, terminate and test various types of electronic cables used in various electronic systems. Identify various functional blocks and I/O Ports of a 8051 microcontroller system, familiarize with the instruction set of 8051 micro controller. Interface a model application with the Microcontroller kit and run the application. Construct and test various modulation/demodulation circuits. The trainee will identify and test various types of sensors used in electronic industries and, construct and test circuits using various sensors system. They can construct and test analog and digital IC based application circuits as a part of project work.

4th Semester – In this semester, the candidate will be able to prepare Fiber optic set up and execute transmission and reception. He is also required to coordinate activities for installation and commissioning of Optical fiber cable (OF) as per the route plan. Trainees will be able to identify the defects & faults, and troubleshoot SMPS, UPS & inverter, replace modules of the LCD/LED TV and its remote. The trainee will be identifying the parts, control circuits, sensor of various domestic appliances. Install/ configure various control adjustment of the display, troubleshoot and secure LCD/LED projector, printer. Identify different accessories of DTH, site selection and installation and perform troubleshooting. Trainees will be able to install a CCTV system and configure the system for surveillance function. Identify various controls play switches, troubleshoot and replace faulty board of a home theater. They will plan and carry out the selection of a project, assemble the project and evaluate its performance for domestic/commercial appliances.

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of Labour market. The vocational training programmes are running under aegis of National Council of Vocational Training (NCVT). Craftsman Training Scheme (CTS) and Apprenticeship Training Scheme (ATS) are two pioneer programmes under NCVT for propagating vocational training.

The Mechanic Consumer Electronic Appliances trade under CTS is one of the popular newly designed courses. The earlier course was Mechanic Consumer Electronics. The course is of two years (04 semester) duration. It mainly consists of trade (skills and knowledge) and Core area (Workshop Calculation & Science, Engineering Drawing and Employability Skills). After passing out of the training program, the trainee is awarded National Trade Certificate (NTC) by NCVT which is recognized worldwide.

Trainee broadly needs to demonstrate that they are able to:

- Read & interpret technical parameters/documentation, plan and organize work processes, identify necessary materials and tools;
- Perform tasks with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional knowledge, core skills & employability skills while performing the job, and repair & maintenance work.
- Check the job with circuit diagrams/components as per drawing for functioning, diagnose and rectify faults in the electronic components/module.
- Document the technical parameters in tabulation sheet related to the task undertaken.

2.2 CAREER PROGRESSION PATHWAYS:

- Can appear in 10+2 examination through National Institute of Open Schooling (NIOS) for acquiring higher secondary certificate and can go further for General/ Technical education.
- Can take admission in the diploma course in notified branches of Engineering by lateral entry.
- Can join Apprenticeship programs in different types of industries leading to a National Apprenticeship certificate (NAC).

- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming an instructor in ITIs.

2.3 COURSE STRUCTURE:

The training duration of course in hours during a period of two years (04 semesters) is as follows:

S No.	Course Element	Notional Training Hours
1	Professional Skill (Trade Practical)	2184
2	Professional Knowledge (Trade Theory)	504
3	Workshop Calculation & Science	168
4	Engineering Drawing	252
5	Employability Skills	110
6	Library & Extracurricular Activities	142
7	Project Work	320
8	Revision & Examination	480
	Total	**4160**

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of the course and at the end of the training program as notified by the Government of India (GoI) from time to time. The employability skills will be tested in the first two semesters itself.

a) The **Internal Assessment** during the period of training will be done by **Formative Assessment Method** by testing for assessment criteria listed against learning outcomes. The training institute has to maintain an individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the template (Annexure – II).

b) The final assessment will be in the form of summative assessment method. The All India Trade Test for awarding NTC will be conducted by NCVT at the end of each semester as per the guideline of Government of India. The pattern and marking structure is being notified by Govt. of India from time to time. **The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The examiner during final examination will also check** the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

The minimum pass percentage for practical is 60% & minimum pass percentage of theory subjects is 40%. For the purposes of determining the overall result, 25% weightage is applied to the result of each semester examination.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences of internal assessments are to be preserved until forthcoming semester examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60%-75% to be allotted during assessment	
For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices	• Demonstration of good skill in the use of hand tools, machine tools and workshop equipment. • Below 70% tolerance dimension achieved while undertaking different work with those demanded by the component/job. • A fairly good level of neatness and consistency in the finish. • Occasional support in completing the project/job.

(b) Weightage in the range of 75%-90% to be allotted during assessment	
For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with little guidance, and regard for safety procedures and practices	• Good skill levels in the use of hand tools, machine tools and workshop equipment. • 70-80% tolerance dimension achieved while undertaking different work with those demanded by the component/job. • A good level of neatness and consistency in the finish. • Little support in completing the project/job.
(c) Weightage in the range of more than 90% to be allotted during assessment	
For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.	• High skill levels in the use of hand tools, machine tools and workshop equipment. • Above 80% tolerance dimension achieved while undertaking different work with those demanded by the component/job. • A high level of neatness and consistency in the finish. • Minimal or no support in completing the project.

Brief description of job roles:

Electronics Fitter, General fits, assembles and repairs various kinds of electronic equipment in factory or workshop or at place of use. Examines drawings and wiring diagrams; checks parts for accuracy of fit and minor adjustments; assembles parts or mounts them on chassis or panels with aid of hand tools; installs and connects wiring, soldering joints equipment, diagnoses faults with aid of electronic testing equipment; dismantles equipment if required and replaces faulty parts or wiring.

Electronics Fitter, other include all other workers engaged in fitting, assembling, repairing and maintaining electronic equipment, machinery, appliances, etc., not elsewhere classified.

Electronics Mechanic; Electronic Equipment Mechanic repairs electronic equipment, such as computers, industrial controls, transmitters, and telemetering control systems following blueprints and manufacturer's specifications and using hand tools and test instruments. Tests faulty equipment and applies knowledge of functional operation of electronic units and systems to diagnose cause of malfunction. Tests electronic components and circuits to locate defects, using instruments, such as oscilloscopes, signal generators, ammeters and voltmeters. Replaces defective components and wiring and adjusts mechanical parts, using hand tools and soldering iron. Aligns, adjusts and calibrates testing instruments. Maintains records of repairs, calibrations and test.

Solar Panel Installation Technician is also known as 'Panel Installer', the Solar Panel Installation Technician is responsible for installing solar panels at the customers' premises. The individual at work checks the installation site, understands the layout requirement as per design, assesses precautionary measures to be taken, installs the solar panel as per customer's requirement and ensures effective functioning of the system post installation.

Optical Fibre Technician is responsible for maintaining uptime and quality of the network segment (both optical media and equipment) assigned to him by undertaking periodic preventive maintenance activities and ensuring effective fault management in case of fault occurrence. He is also required to coordinate activities for installation and commissioning of Optical Fibre Cable (OF) as per the route plan.

Field Technician: UPS and Inverter is also called, 'UPS Repair Technician', this is an after sales service job for installing and providing support to customers of different types of UPS and inverters. The individual at work installs the newly purchased UPS or inverter. The individual also and interacts with customers to diagnose problems in them, assesses possible causes, rectifies faults or replaces faulty modules or recommends factory repairs for bigger faults as per the route plan. Installation, service, repair and overhaul radio sets service centre. May install television sets.

Cable Television Installer installs cable television cables and equipment on customer's premises, using electrician's tools and test equipment: Measures television signal strength at utility pole, using electronic test equipment. Computes impedance of wire from pole to house to determine additional resistance needed for reducing signal to desired level. Installs terminal boxes and strings lead-in wires, using electrician's tools. Connects television set to cable system and evaluates incoming signal. Adjusts and repairs cable system to ensure optimum reception. May collect installation fees and explain cable service operation to subscriber. May clean and maintain tools, test equipment.

Television Repair Technician job role is applicable to both Television manufacturing facilities as well as electronics service centres. This role pertains to rectifying faults identified during testing of TV on in manufacturing process and providing after sales assistance and ensuring appropriate functioning of television sets. A TV repair technician identifies the section in the TV that is not functioning. If the problem identified is in the Printed Circuit Board (PCB), the technician identifies the specific fault in the PCB and corrects it. Replaces the dysfunctional PCB with a new one, if the damage identified requires fixing at the service centre.

DTH Set-Top Box Installer and Service Technician installs set-top boxes and provides after sales service for Direct to Home (DTH) system. The individual at work installs the set-top box at customers' premises; addresses the field serviceable complaints and co-ordinates with the technical team for activation of new connections.

Field Technician, Washing Machine is also, called 'Washing Machine Repair Technician'. This job is about providing after sales service to customers. The individual at work installs the washing machine, interacts with customers to diagnose the problem and assesses possible causes of fault reported. Once the problem and causes have been identified, the individual rectifies minor problems or replaces faulty modules for failed parts or recommends factory repairs for bigger faults.

Field Technician, Other Home Appliances is also called, 'Home Appliance Repair Technician', this is an after sales service job for installing and providing support to the water purifier, mixer/grinder buyers. The individual at work installs the appliance and interacts with customers to diagnose the problem and possible causes. Once the problem and causes have been identified, the individual rectifies minor problems or replaces faulty modules for failed parts or recommends factory repairs for bigger faults.

Access Controls Installation Technician: Also called 'Access Control Device Installer', the Access Control Installation Technician provides after sale support services for access control devices and systems such as point of sale scanners, finger print or iris scan. The individual at work is responsible for installing the access control system at the customer's premises. The individual undertakes site assessment, installs the hardware and integrates the system to meet customer's requirement.

Field Engineer TV is also called, 'Service Engineer – TV', the TV Field Engineer provides installation and after sales service to buyers of TV and other consumer electronic products such

as home theatre system, DVD and Blu-ray players, audio systems, headphones etc. The individual at work interacts with customers to install the entertainment system and diagnose any problems to assess possible causes of malfunction. Once the problem and causes have been identified, the individual rectifies minor problems or replaces faulty modules for failed parts or recommends factory repairs for bigger faults.

Plan and organize assigned work and detect & resolve issues during execution. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

NSQF Level	Level-5
Duration of Craftsmen Training	2 Years (4 Semesters having duration of six months each)
Entry Qualification	Passed 10th class examination under 10+2 System of education
Unit Strength (No. Of Students)	20 (Max. supernumeraries seats: 6)
Space Norms	56 Sq m
Power Norms	3.04 KW
Instructors Qualification for:	
1. Mechanic Consumer Electronic Appliances Trade	Degree in Electronics/ Electronics and Telecommunication/ Electronics and Communication Engineering from recognized Engineering College/ university with one-year post qualification experience in the relevant field. **OR** Diploma in Electronics/ Electronics and Telecommunication/ Electronics and Communication from recognized board of technical education with two-year post qualification experience in the relevant field. **OR** 10th class examination and NTC/NAC in the trade with 3 years' post qualification experience in the relevant field. **Desirable:** Preference will be given to a candidate with CIC (Craft Instructor Certificate) in **Mechanic Consumer Electronic Appliances** trade. ***Out of two Instructors required for the unit of 2 (1+1), one must have Degree/Diploma and other must have NTC/NAC qualifications.***
2. Workshop Calculation & Science	Degree in Engineering with one year experience. **OR**

	Diploma in Engineering with two-year experience.
	Desirable:
	Craft Instructor Certificate in RoD &A course under NCVT.
3. Engineering Drawing	Degree in Engineering with one year experience.
	OR
	Diploma in Engineering with two-year experience.
	OR
	NTC/ NAC in the Draughtsman (Mechanical/ Civil) with three-year experience.
	Desirable:
	Craft Instructor Certificate in RoD & A course under NCVT.
4. Employability Skill	MBA OR BBA with two-year experience OR Graduate in Sociology/ Social Welfare/ Economics with two-year experience OR Graduate/ Diploma with two-year experience and trained in Employability Skills from DGT institutes.
	AND
	Must have studied English/ Communication Skills and Basic Computer at 12th/ Diploma level and above.
	OR
	Existing Social Studies Instructors duly trained in Employability Skills from DGT institutes
List of Tools and Equipment	As per Annexure – I

Distribution of training on hourly basis: (Indicative only)

Total Hours /Week	Trade Practical	Trade Theory	Workshop Cal. &Sc.	Engg. Drawing	Employability Skills	Extra-curricular activity
40 Hours	25 Hours	6 Hours	2 Hours	3 Hours	2 Hours	2 Hours

NSQF level for Mechanic Consumer Electronic Appliances trade under CTS: **Level 5**

As per notification issued by Govt. of India dated- 27.12.2013 on National Skill Qualification Framework total 10 (Ten) Levels are defined.

Each level of the NSQF is associated with a set of descriptors made up of five outcome statements, which describe in general terms, the minimum knowledge, skills and attributes that a learner needs to acquire in order to be certified for that level.

Each level of the NSQF is described by a statement of learning outcomes in five domains, known as level descriptors. These five domains are:

        a.   Process
        b.   Professional Knowledge
        c.   Professional Skill
        d.   Core Skill
        e.   Responsibility

The broad Learning outcome of Mechanic Consumer Electronic Appliances trade under CTS mostly matches with the Level descriptor at Level- 5.

The NSQF level-5 descriptor is given below:

Level	Process Required	Professional Knowledge	Professional Skill	Core Skill	Responsibility
Level 5	Job that requires well developed skill, with clear choice of procedures in familiar context.	Knowledge of facts, principles, processes and general concepts, in a field of work or study	A range of cognitive and practical skills required to accomplish tasks and solve problem by selecting and applying basic methods, tools, materials and information.	Desired mathematical skill, understanding of social, political and some skill of collecting and organizing information, communication.	Responsibility for own work and learning and some responsibility for other's work and learning.

6. LEARNING/ ASSESSABLE OUTCOME

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

6.1 GENERIC LEARNING OUTCOME

The following are minimum broad common occupational skills/ generic learning outcome after completion of the Mechanic Consumer Electronic Appliances course of 02 years duration:

1. Apply safe working practices.
2. Comply with environment regulation and housekeeping.
3. Interpret & use company and technical communication
4. Demonstrate basic mathematical concept and principles to perform practical operations.
5. Understand and explain basic science in the field of study including simple machine.
6. Read and apply engineering drawing for different application in the field of work.
7. Understand and apply the concept in productivity, quality tools, and labour welfare legislation in day-to-day work to improve productivity & quality.
8. Explain energy conservation, global warming and pollution and contribute in day-to-day work by optimally using available resources.
9. Explain personnel finance, entrepreneurship and manage/organize related task in day-to-day work for personal & societal growth.
10. Utilize basic computer applications and internet to take benefit of IT developments in the industry.

6.2 SPECIFIC LEARNING OUTCOME

11. Perform basic workshop operations using suitable tools for fitting, riveting, drilling etc. observing suitable care & safety.
12. Select and perform electrical/ electronic measurement of single range meters and calibrate the instrument.
13. Test & service different batteries used in electronic applications and record the data to estimate repair cost.
14. Plan and execute soldering & de-soldering of various electrical components like Switches, PCB & Transformers for electronic circuits.
15. Test various electronic components using proper measuring instruments and compare the data using standard parameter.
16. Assemble simple electronic power supply circuit and test for functioning.

17. Install, configure, interconnect given computer system(s) and demonstrate & utilize application packages for different application.
18. Plan and carry out the selection of a project, assemble the project and evaluate performance for domestic/commercial applications.
19. Construct, test and verify the input/output characteristic of various analog circuits.
20. Plan and construct different power electronic circuits and analyse the circuit functioning.
21. Select the appropriate opto-electronics components and verify the characteristics in different circuit.
22. Assemble, test and troubleshoot various digital circuits.
23. Simulate and analyze the analog and digital circuits using Electronic simulator software.
24. Identify, place, solder and desolder and test different SMD discrete components and IC's package with due care and following safety norms using proper tools/setup.
25. Construct and test different circuits using ICs 741 Operational amplifiers & ICs 555 linear integrated circuits and execute the result.
26. Measure the various parameters by DSO and execute the result with standard one.
27. Rework on PCB after identifying defects from SMD soldering and de-soldering.
28. Construct different electrical control circuits and test for their proper functioning with due care and safety.
29. Prepare, crimp, terminate and test various cables used in different electronics industries.
30. Assemble and test a commercial AM/FM receiver and evaluate performance.
31. Test, service and troubleshoot the various components of different domestic/ industrial programmable systems.
32. Execute the operation of different process sensors, identify, wire & test various sensors of different industrial processes by selecting appropriate test instruments.
33. Plan and carry out the selection of a project, assemble the project and evaluate performance for domestic/ commercial applications.
34. Prepare fibre optic set up and execute transmission and reception.
35. Detect the faults and troubleshoot SMPS, UPS and inverter.
36. Identify, operate various controls, troubleshoot and replace modules of the LCD/LED TV and its remote.
37. Install/configure, various control adjustment of the display, troubleshoot and secure LCD/LED projector/ printer.
38. Install a DTH system by proper selection of site, assembling of different parts/ accessories and troubleshoot the system.
39. Dismantle; identify the parts, control circuits, sensors of a various domestic appliance. Estimate and troubleshoot.

40. Install a CCTV system and configure the system for surveillance function.
41. Identify, operate various controls play switches, troubleshoot and replace faulty boards of a home theatre and its remote.
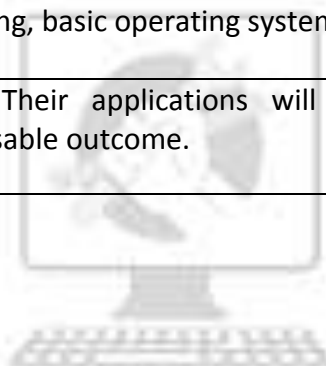

7. LEARNING OUTCOME WITH ASSESSMENT CRITERIA

GENERIC LEARNING/ ASSESSABLE OUTCOME	
LEARNING / ASSESSABLE OUTCOME	**ASSESSMENT CRITERIA**
1. Apply safe working practices	1.1 Follow and maintain procedures to achieve a safe working environment in line with occupational health and safety regulations and requirements and according to site policy.
	1.2 Recognize and report all unsafe situations according to site policy.
	1.3 Identify and take necessary precautions on fire and safety hazards and report according to site policy and procedures.
	1.4 Identify, handle and store/ dispose of dangerous goods and substances according to site policy and procedures following safety regulations and requirements.
	1.5 Identify and observe site policies and procedures with regard to illness or accident.
	1.6 Identify safety alarms accurately.
	1.7 Report supervisor/ Competent of authority in the event of accident or sickness of any staff and record accident details correctly according to site accident/injury procedures.
	1.8 Identify and observe site evacuation procedures according to site policy.
	1.9 Identify Personal Productive Equipment (PPE) and use the same as per related working environment.
	1.10 Identify basic first-aid and use them under different circumstances.
	1.11 Identify different fire extinguisher and use the same as per requirement.
2. Comply with environment regulation and housekeeping.	2.1 Identify environmental pollution & contribute to the avoidance of instances of environmental pollution.
	2.2 Deploy environmental protection legislation & regulations.
	2.3 Take opportunities to use energy and materials in an environmentally friendly manner.
	2.4 Avoid waste and dispose waste as per procedure.
	2.5 Recognize different components of 5S and apply the same in the working environment.
3. Interpret & use	3.1 Obtain sources of information and recognize information.

company and technical communication.	3.2 Use and draw up technical drawings and documents.
	3.3 Use documents and technical regulations and occupationally related provisions.
	3.4 Conduct appropriate and target oriented discussions with higher authority and within the team.
	3.5 Present facts and circumstances, possible solutions &use special English terminology.
	3.6 Resolve disputes within the team.
	3.7 Conduct written communication.
4. Demonstrate basic mathematical concept and principles to perform practical operations.	4.1 Semester examination to test basic skills on arithmetic, algebra, trigonometry and statistics.
	4.2 Applications will be assessed during execution of assessable outcome and will also be tested during theory and practical examination.
5. Understand and explain basic science in the field of study including simple machine.	5.1 Semester examination to test basic skills on science in the field of study including friction, heat, temperature and simple machine.
	5.2 Applicationswill be assessed during execution of assessable outcome and will also be tested during theory and practical examination.
6. Read and apply engineering drawing for different application in the field of work.	6.1 Semester examination to test basic skills on engineering drawing.
	6.2 Applications will be assessed during execution of assessable outcome and will also be tested during theory and practical examination.
7. Understand and apply the concept in productivity, quality tools, and labour welfare legislation in day-to-day work to improve productivity & quality.	7.1 Semester examination to test the concept in productivity, quality tools and labour welfare legislation.
	7.2 Applications will be assessed during execution of assessable outcome.
8. Explain energy conservation, global warming, pollution and contribute in day-to-day	8.1 Semester examination to test knowledge on energy conservation, global warming and pollution.
	8.2 Their applications will be assessed during execution of assessable outcome.

work by optimally using available resources.	
9. Explain personnel finance, entrepreneurship and manage/organize related task in day-to-day work for personal & societal growth.	9.1 Semester examination to test knowledge on personnel finance, entrepreneurship.
	9.2 Their applications will be assessed during execution of assessable outcome.
10. Utilize basic computer applications and internet to take benefit of IT developments in the industry.	10.1 Semester examination to test knowledge on basic computer working, basic operating system and uses internet services.
	10.2 Their applications will be assessed during execution of assessable outcome.

SPECIFIC LEARNING/ ASSESSABLE OUTCOMES	
Semester-I	
LEARNING/ ASSESSABLE OUTCOMES	**ASSESSMENT CRITERIA**
11. Perform basic workshop operations using suitable tools for fitting, riveting, drilling etc. observing suitable care & safety	11.1 Identify basic hand tools for fitting, riveting, drilling etc. with due care and safety.
	11.2 Fix surface mounting type of accessories in a panel board.
	11.3 Connect electrical accessories.
	11.4 Make and wire up of a test board and test it.
12. Select and perform electrical/ electronic measurement of single range meters and calibrate the instrument.	12.1 Plan work in compliance with standard safety norms.
	12.2 Identify the type of electronic instruments.
	12.3 Determine the measurement errors while measuring resistance by voltage drop method.
	12.4 Extend the range of MC voltmeter and ammeter.
	12.5 Measure the value of resistance, voltage and current using digital multimeter.
	12.6 Calibrate analog multimeter.
13. Test &service different batteries used in electronic applications and record the data to estimate repair cost.	13.1 Identify tools and instruments for testing of batteries.
	13.2 Observe safety procedure during testing of batteries and work as per standard norms and company guidelines.
	13.3 Identify the primary and secondary cells.
	13.4 Measure and test the voltages of the given cells/battery using analog/ digital multimeter.
	13.5 Charging and discharging the battery.
	13.6 Maintain and estimate the repair cost of secondary battery.
	13.7 Use a hydrometer to measure the specific gravity of the secondary battery.
14. Plan and execute soldering & de-soldering of various electrical components like Switches, PCB &	14.1 Plan work in compliance with standard safety norms.
	14.2 Identify different types of mains transformer and test.
	14.3 Identify the primary and secondary transformer windings and test the polarity.

	Transformers for electronic circuits.	14.4 Measure the primary and secondary voltage of different transformers.
		14.5 Solder the given components
		14.6 Identify and test the variac.
		14.7 Avoid waste, ascertain unused materials and components for disposal, store these in an environmentally appropriate manner and prepare for disposal.
15.	Test various electronic components using proper measuring instruments and compare the data using standard parameter.	15.1 Ascertain and select tools and materials for the job and make this available for use in a timely manner.
		15.2 Plan work in compliance with standard safety norms.
		15.3 Identify the different types of resistors.
		15.4 Measure the resistor values using colour code and verify the reading by measuring in multi-meter.
		15.5 Identify the power rating using size.
		15.6 Measure the resistance, Voltage, Current through series and parallel connected networks using multi meter.
		15.7 Identify different inductors and measure the values using LCR meter.
		15.8 Identify the different capacitors and measure capacitance of various capacitors using LCR meter.
		15.9 Ascertain and select tools and materials for the job and make this available for use in.
16.	Assemble simple electronic power supply circuit and test for functioning.	16.1 Practice soldering on components, lug and board with safety.
		16.2 Identify the passive/active components by visual appearance, Code number and test for their condition.
		16.3 Identify the control and functional switches in CRO and measure the D.C. & A.C. voltage, frequency and time period.
		16.4 Construct and test a half & full wave rectifiers with and without filter circuits.
		16.5 Construct and test a bridge rectifier with and without filter circuits.
		16.6 Construct and test a Zener based voltage regulator circuit.

17.	Install, configure, interconnect given computer system(s) and demonstrate & utilize application packages for different application.	17.1	Plan, work in compliance with standard safety norms.
		17.2	Select hardware and software component.
		17.3	Install and configure operating systems and applications.
		17.4	Integrate IT systems into networks.
		17.5	Deploy tools and test programmes.
		17.6	Avoid e-waste and dispose the waste as per the procedure.
18.	Plan and carry out the selection of a project, assemble the project and evaluate performance for domestic/commercial applications.	18.1	Plan, analyze and estimate the cost of the particular project.
		18.2	Identify the various tools required for the job.
		18.3	Prepare the simple digital/analog electronic circuit.
		18.4	Simulate and test the prepared circuit.
		18.5	Assemble and test the circuit.

Semester-II			
19.	Construct, test and verify the input/ output characteristics of various analog circuits.	19.1	Ascertain and select tools and instruments for carrying out the jobs.
		19.2	Plan and work in compliance with standard safety norms.
		19.3	Practice on soldering components on lug board with safety.
		19.4	Identify the passive/active components by visual appearance, code number and test for their condition.
		19.5	Construct and test the transistor based switching circuit.
		19.6	Construct and test CB, CE &CC amplifier circuit.
		19.7	Ascertain the performance of different oscillator circuits.
		19.8	Construct and test clipper, clamper and Schmitt trigger circuit.
20.	Plan and construct different power electronic circuits and analyze the circuit functioning.	20.1	Construct and test of Transistor and JFET amplifiers, oscillators and multi-vibrators.
		20.2	Construct and test a UJT as relaxation oscillator.
		20.3	Construct and test lamp dimmer using TRIAC/DIAC with safety.
		20.4	Construct and test MOSFET, IGBT test circuit and apply for suitable operation with proper safety.
		20.5	Construct and test the universal motor speed controller using SCR with safety.
		20.6	Construct and test a switching circuit using optical devices.

21.	Select the appropriate opto-electronics components and verify the characteristics in different circuit.	21.1	Plan work in compliance with standard safety norms.
		21.2	Identify the different types of LEDs and IR LEDs.
		21.3	Measure the resistance, voltage, current through electronic circuit using multimeter.
		21.4	Construct and test a circuit using photo transistor and verify its characteristics.
		21.5	Identify photo coupler/ optical sensor input/output terminals and measure the quantum of isolation between the terminals.
22.	Assemble, test and troubleshoot various digital circuits.	22.1	Illustrate to practice the digital trainer kit with safety.
		22.2	Identify various digital ICs, test IC using digital IC tester and verify the truth table.
		22.3	Construct and verify the truth table of all gates using NOR and NAND gates.
		22.4	Construct an adder cum subtractor circuits and verify the truth table.
		22.5	Construct a decoder and encoder, multiplexer and de-multiplexer circuits and verify the truth table.
		22.6	Construct a multiplexer and de-multiplexer and verify the truth table.
		22.7	Construct and verify the truth table of various flip flop, counter and shift register circuits.
23.	Simulate and analyze the analog and digital circuits using Electronic simulator software.	23.1	Plan the work incompliance with standard procedure.
		23.2	Prepare simple analog and digital electronic circuits using the simulator software.
		23.3	Simulate and test the prepared analog and digital circuits.
		23.4	Convert the prepared circuit into layout diagram.
		23.5	Explore various trouble shooting and fault finding the resources provided in the simulation software.
24.	Identify, place, solder and desolder and test different SMD discrete components and ICs package with due care and following safety norms using proper tools/setup.	24.1	Identify the various crimping tools for various IC packages.
		24.2	Identify different types of soldering guns and choose the suitable tip for the application.
		24.3	Practice the soldering and de-soldering the different active and passive components, IC base on GPCBs using solder, flux, pump and wick.

		24.4	Make the necessary setting on SMD soldering station to solder and de-solder various IC's of different packages by following the safety norms.
		24.5	Identify SMD components, de-solder and solder the SMD components on the PCB.
		24.6	Check the cold continuity, identify loose/dry solder and broken track on printed wired assemblies and rectify the defects.
		24.7	Avoid waste, ascertain unused materials and components for safe disposal.
25.	Construct and test different circuits using ICs 741operational amplifiers & ICs 555 linear integrated circuits and execute the result.	25.1	Demonstrate analog trainer kit with safety precautions.
		25.2	Identify various ICs, differentiate by code No. and test for their condition.
		25.3	Construct and test various OPAMP circuits.
		25.4	Construct and test R-2R ladder type digital to analog converter circuit.
		25.5	Construct and test different configurations of 555 IC e.g. astable, monostable, bi-astable and VCO circuits.
Semester-III			
26.	Measure the various parameters by DSO and execute the result with standard one.	26.1	Identify and demonstrate various control elements on front panel of a DSO.
		26.2	Measure different parameters of electronic signals using DSO.
		26.3	Store the waveform of a signal in DSO.
		26.4	Connect DSO with a printer and take printout of signal waveforms.
27.	Rework on PCB after identifying defects from SMD soldering and de-soldering.	27.1	Plan the work in compliance with standard safety procedures.
		27.2	Demonstrate various tools and accessories used in PCB rework.
		27.3	Construct a PCB to demonstrate defects on soldered joints.
		27.4	Repair defective soldered joints.
28.	Construct different electrical control circuits and test for their proper functioning with due care and safety.	28.1	Measure the coil winding of the given motor.
		28.2	Prepare the setup and control an induction motor using a DOL starter by following the safety norms.
		28.3	Construct a direction control circuit to change direction of an induction motor.
		28.4	Connect an overload relay and test for its proper

			functioning.
29.	Prepare, crimp, terminate and test various cables used in different electronics industries.	29.1	Plan and work incompliance with standard safety norms.
		29.2	Prepare, terminate and test various electronics cable using proper crimping tools.
30.	Assemble and test a commercial AM/ FM receiver and evaluate performance.	30.1	Plan and select tools to assemble the receiver.
		30.2	Modulate and demodulate various signals using AM and FM on the trainer kit and observe waveforms.
		30.3	Construct and test IC based AM Receiver.
		30.4	Construct and test IC based FM transmitter and receiver.
		30.5	Modulate and demodulate a signal using PAM, PPM, PWM Techniques.
		30.6	Troubleshoot and replace the faulty components.
		30.7	Check the functionality of AM/FM receiver.
31.	Test, service and troubleshoot the various components of different domestic/ industrial programmable systems.	31.1	Understand and interpret the procedure as per manual of Micro controller.
		31.2	Identity various ICs & their functions on the given Microcontroller Kit.
		31.3	Identify the address range of RAM & ROM.
		31.4	Write data into RAM & observe its volatility.
		31.5	Identify the port pins of the controller & configure the ports for Input & Output operation.
		31.6	Demonstrate entering of simple programs, execute & monitor the results.
32.	Execute the operation of different process sensors, identify, wire & test various sensors of different industrial processes by selecting appropriate test instruments.	32.1	Ascertain and select tools, material for the job and make this available for use in the timely manner.
		32.2	Plan work in compliance with safety norms.
		32.3	Demonstrate possible solution and agree task within the team.
		32.4	Identify sensors used in process industries such as RTDs, Temperature ICs, Thermocouples, proximity switches (inductive, capacitive and photo electric), load cells, strain gauge. LVDT by their appearance.
		32.5	Measure temperature of a lit fire using a Thermocouple and record the readings referring to data chart.

		32.6	Measure temperature of a lit fire using RTD and record the readings referring to data chart.
		32.7	Measure the DC voltage of a LVDT.
		32.8	Detect different objectives using capacitive, inductive and photoelectric proximity sensors.
33.	Plan and carry out the selection of a project, assemble the project and evaluate performance for domestic/commercial applications.	33.1	Plan, analyze and estimate the cost of the particular project.
		33.2	Identify the various tools required for the job.
		33.3	Prepare the simple digital/ analog electronic circuit.
		33.4	Simulate and test the prepared circuit.
		33.5	Assemble and test the circuit.
Semester-IV			
34.	Prepare fibre optic setup and execute transmission and reception	34.1	Plan and select appropriate tools to complete the job safely.
		34.2	Identify the resources and their need on the given fiber optic trainer kit.
		34.3	Make optical fibre setup to transmit and receive analog and digital data.
		34.4	Demonstrate and apply FM modulation and demodulation using OFC trainer kit using audio signal and voice link.
		34.5	Demonstrate PWM modulation and demodulation using OFC trainer kit using audio signal.
		34.6	Demonstrate PPM modulation and demodulation using OFC trainer kit using audio.
35.	Detect the faults and troubleshoot SMPS,UPS and Inverter.	35.1	Identify the tools and equipments to perform the job with due care and safety.
		35.2	Dismantle the given stabilizer and find major sections/ ICs components.
		35.3	Identify various input and output sockets/ connectors of the given SMPS.
		35.4	Identify major sections/ ICs/components of SMPS.
		35.5	Identify and replace the faulty components and construct and test IC Based DC-DC converter for different voltages.
		35.6	Identify front panel control & indicators of UPS.
		35.7	Identify various circuit boards in UPS and monitor voltages at various test points.
		35.8	Test UPS under Fault condition & rectify fault.

36.	Identify, operate various controls, troubleshoot and replace modules of the LCD/LED TV & its remote.	36.1	Ascertain and select tools and materials for the job and make this available for use in a timely manner.
		36.2	Select measuring procedure and measuring devices, assess measurement errors and set up LCD/LED TV.
		36.3	Dismantle, identify the parts of the remote control.
		36.4	Trace and rectify the faults of a various remote controls.
		36.5	Measured and checked various connectors and connect the cable operator's external decoder (set top box) to the TV.
		36.6	Comply with safety rules when performing the above operations.
		36.7	Monitor, evaluated and check own work and work done by others.
37.	Install/configure, various control adjustment of the display, troubleshoot and secure LCD/LED projector and printer.	37.1	Ascertain & select tools and equipment an order-related in a timely manner.
		37.2	Identify and operate different control on LCD/ LED projector.
		37.3	Select the proper parts use suitable cable to interface to the desktop computer, make necessary adjustment and operate.
		37.4	Dismantle the projector and identify all major functional modules, test the power supply, exhaust fan etc.
		37.5	Comply with safety rules when performing the above operations.
		37.6	Select, prepare, lay and use of controls/ switches/ sockets of a dot matrix printer and internal assembly/ section/parts of Printer.
		37.7	Select and handle measuring equipment for the measurement and checking paper sensor, print head coils, home position sensor, print head needle coil & cleaning of ribbon mask, paper feed motor gears, printer head movement gears, print head guide and troubleshoot.

	37.8	Select, install, wire up & use of controls/ switches/ sockets of an inkjet printer, interconnect printer to computer, perform printer test & clean the ink cartridge and troubleshoot.
	37.9	Identify & use of controls/ switches/ sockets of a Laser printer interconnect printer to computer, perform printer test & cleaning of an ink cartridge and rectify the faults.
	37.10	Monitor, evaluate and check own work and work done by others.
38.	Identify different parts, accessories, selection of site and install, troubleshoot of the DTH.	38.1 Plan & setup the workplace different tools and equipment used in DTH installation procedure & cabling procedure and take due care using the tools.
		38.2 Monitor form of a surface areas a DTH system, select the site accordance with technical requirements and track for azimuth and elevation angles using SAT meter. Set up the connection to STB by selecting the suitable port and cable.
		38.3 Identify the faults in DTH system & rectify.
		38.4 Document materials, spare parts, work time and technical checks.
		38.5 Monitor, evaluate and check own work.
39.	Dismantle, identity the parts, control circuits, sensors of a various domestic appliances. Estimate and troubleshoot.	39.1 Systematically seek causes of errors and qualify defects, rectify and document such errors and defects.
		39.2 Identify, use the controls on touch keypad of Microwave oven, dismantle, wire the Microwave oven and rectify the faults.
		39.3 Identify the faults in the given Microwave oven & rectify.
		39.4 Dismantle and identify of various parts, sensors, wire, trace of various controls, Electronic circuits, in various types of washing M/C and rectify the faults.
		39.5 Dismantle and identify various parts, electric circuits in various types of Vacuum cleaners and rectify the faults.
		39.6 Assemble and identify of various parts, electric circuits in various types of mixer/grinder and rectify the faults.
		39.7 Dismantle and identify various parts of steam iron and rectify the faults.
		39.8 Dismantle and identify the various parts, electronic

		circuits in of rice cooker and rectify the faults.
		39.9 Select test methods and test equipment for various component of water purifier, dismantle, clean and replace the worn out consumable parts following the troubleshooting manual and assemble the water purifier and install.
		39.10 Dismantle and identify the various parts, wire and electrical and electronics circuit in Induction cook-top, replace the Induction tube (coil) in Induction cook-top.
40.	Install a CCTV system and configure the system for surveillance function.	40.1 Identify & use different tools and equipment used for installation of CCTV, handle the tools with due care and safety.
		40.2 Identify the different CCTV components, Trace or follow the CCTV setup for any commercial installation.
		40.3 Identify the strategic locations for the installation of cameras.
		40.4 Plan and setup the procedure for switching the cameras to have different views.
		40.5 Identify the connectors and sockets used on DVRs, connect CCTV Cameras to DVR, Record and Replay.
		40.6 Dismantle DVR and identify major functional blocks and test for the healthiness.
		40.7 Make tools, machine tools, taste measure equipment and technical equipment ready for operational use, check and maintain such tools and equipment and initiate measures for the rectify of errors.
		40.8 Monitor, evaluate and check own work.
41.	Identify, operate various controls, play switches, troubleshoot and replace faulty boards of a home theatre and its remote.	41.1 Select test methods and test use of different parts of home theatre, test the speakers, woofers & tweeters.
		41.2 Contribute to continuous improvement troubleshoot of work process in home theatre front panel.
		41.3 Install/setup of home theatre using specific devices.
		41.4 Identify different parts of AV receiver and rectify the faults.
		41.5 Dismantle, identify the parts of the remote control, trace and rectify the faults of a various remote controls as home theatre.

	41.6 Document materials, spare parts, work time and technical checks.

	SYLLABUS FOR MECHANIC CONSUMER ELECTRONIC APPLIANCES TRADE		
	FIRST SEMESTER- 6 MONTHS		
Week No.	**Learning Outcome**	**Professional Skills (Trade Practical) with Indicative hrs.**	**Professional Knowledge (Trade Theory)**
1	• Apply safe working practices	**Trade and Orientation** 1. Visit to various sections of the institute and identify location of various installations. (05 hrs) 2. Identify safety signs for danger, warning, caution & personal safety message. (03 hrs) 3. Use of personal protective equipment (PPE). (05 hrs) 4. Practice elementary first-aid.(05 hrs) 5. Preventive measures for electrical accidents & steps to be taken in such accidents.(02 hrs) 6. Use of Fire extinguishers.(05 hrs)	Familiarization with the working of Industrial Training Institute system. Importance of safety and precautions to be taken in the industry/shop floor. Introduction to PPEs. Introduction to First-Aid. Response to emergencies e.g. power failure, fire, and system failure. Importance of housekeeping & good shop floor practices. Occupational Safety & Health: Health, Safety and Environment guidelines, legislations & regulations as applicable.
2-3	• Perform basic workshop operations using suitable tools for fitting, riveting, drilling etc. observing suitable care & safety.	**Hand tools and their uses** 7. Identify the different hand tools. (05 hrs) 8. Selection of proper tools for operation and precautions in operation. (07 hrs) 9. Care & maintenance of trade tools. (08 hrs) 10. Practice safety precautions while working in fitting jobs. (10 hrs) 11. Workshop practice on filing and hacks swing. (05 hrs) 12. Practice simple sheet metal	Identification, specifications, uses and maintenance of commonly used hand tools. State the correct shape of files for filing different profiles. Riveting of tags and lugs, cutting and bending of sheet metals, chassis and cabinets.

		works, fitting and drilling.(05 hrs) 13. Make an open box from metal sheet. (10 hrs)	
4-5	Select and perform electrical/ electronic measurement of single range meters and calibrate the instrument.	**Basics of AC and Electrical Cables** 14. Identify the Phase, Neutral and Earth on power socket, use testers to monitor AC power. (06 hrs) 15. Construct a test lamp and use it to check mains healthiness. (07 hrs) 16. Measure the voltage between phase and ground and rectify earthing. (05 hrs) 17. Identify and test different AC mains cables. (07 hrs) 18. Prepare terminations, skin the electrical wires/cables using wire stripper and cutter. (07 hrs) 19. Measure the gauge of the wire using SWG and outside micro-meter. (05 hrs) 20. Refer table and find current carrying capacity of wires. (03 hrs) 21. Crimp the lugs to wire end. (05 hrs) 22. Measure AC and DC voltages using multi-meter. (05 hrs)	Basic terms such as electric charges, Potential difference, Voltage, Current, Resistance. Basics of AC & DC. Various terms such as +ve cycle, -ve cycle, Frequency, Time period, RMS, Peak, Instantaneous value. Single phase and three phase supply. Terms like Line and Phase voltage/ currents. Insulators, conductors and semiconductor properties. Different type of electrical cables and their specifications. Types of wires & cables, standard wire gauge (SWG). Classification of cables according to gauge (core size), number of conductors, material, insulation strength, flexibility etc.
6	Select and perform electrical/ electronic measurement of single range meters and calibrate the instrument.	**Single range meters** 23. Identify the type of meters by dial and scale marking/ symbols. (03 hrs) 24. Demonstrate various analog measuring instruments. (03 hrs) 25. Find the minimum and maximum measurable range of the meter. (03 hrs) 26. Carryout mechanical zero setting of a meter. (05 hrs) 27. Check the continuity of wires, meter probes and fuse etc. (05 hrs)	Introduction to electrical and electronic measuring instruments. Basic principle and parts of simple meters. Specifications, symbols used in dial and their meaning.

		28. Measure voltage and current using clamp meter. (06 hrs)	
7	Test &service different batteries used in electronic applications and record the data to estimate repair cost.	**Cells & Batteries** 29. Identify the +ve and -ve terminals of the battery. (02 hrs) 30. Identify the rated output voltage and Ah capacity of given battery. (01 hr) 31. Measure the voltages of the given cells/battery using analog/ digital multimeter. (03 hrs) 32. Charge and discharge the battery through load resistor. (05 hrs) 33. Maintain the secondary cells. (05 hrs) 34. Measure the specific gravity of the electrolyte using hydrometer. (03 hrs) 35. Test a battery and verify whether the battery is ready for use of needs recharging. (06 hrs)	**Cells & Batteries** Construction, types of primary and secondary cells. Materials used, specification of cells and batteries. Charging process, efficiency, life of cell/battery. Selection of cells/ batteries etc. Use of Hydrometer. Types of electrolytes used in cells and batteries. Series/ parallel connection of batteries and purpose of such connections.
8-9	• Test various electronic components using proper measuring instruments and compare the data using standard parameter.	**AC & DC measurements** 36. Use the multi-meter to measure the various functions (AC V, DC V, DC I, AC I, R) (08hrs) 37. Identify the different types of meter for measuring AC & DC parameters (08hrs) 38. Identify the different controls on the CRO front panel and observe the function of each control (12hrs) 39. Measure DC voltage, AC voltage, time period using CRO sine wave parameters (10hrs) 40. Identify the different controls on the function generator front	Introduction to electrical measuring instruments. Importance and classification of meters. Forces necessary to work a meter. MC and MI meters. Range extension, need of calibration. Characteristics of meters and errors in meters. Multi meter, use of meters in different circuits. Care and maintenance of meters. Use of CRO, Function generator, LCR meter

		panel and observe the function of each control. (12hrs)	
10	• Plan and execute soldering & de-soldering of various electrical components like Switches, PCB & Transformers for electronic circuits.	**Soldering/ De-soldering and Various Switches** 41. Practice soldering on different electronic components, small transformer and lugs. (05 hrs) 42. Practice soldering on IC bases and PCBs. (05 hrs) 43. Practice de-soldering using pump and wick. (02 hrs) 44. Join the broken PCB track and test. (03 hrs) 45. Identify and use SPST, SPDT, DPST, DPDT, tumbler, push button, toggle, piano switches used in electronic industries (05 hrs) 46. Make a panel board using different types of switches for a given application. (05 hrs)	Different types of soldering guns, related to temperature and wattages, types of tips. Solder materials and their grading. Use of flux and other materials. Selection of soldering gun for specific requirement. Soldering and de-soldering stations and their specifications. Different switches, their specification and usage.
11-13	• Test various electronic components using proper measuring instruments and compare the data using standard parameter.	**Active and Passive Components** 47. Identify the different types of active electronic components. (03hrs) 48. Measure the resistor value by colour code and verify the same by measuring with multimeter (03 hrs) 49. Identify resistors by their appearance and check physical defects. (02 hrs) 50. Identify the power rating of carbon resistors by their size. (03 hrs) 51. Practice on measurement of parameters in combinational electrical circuit by applying Ohm's Law for different resistor values and voltage sources. (09 hrs) 52. Measurement of current and	Ohm's law and Kirchhoff's Law. Resistors; types of resistors, their construction & specific use, color-coding, power rating. Equivalent resistance of series parallel circuits. Distribution of V & I in series parallel circuits. Principles of induction, inductive reactance. Types of inductors, construction, specifications, applications andenergy storage concept. Self and mutual induction. Behaviour of inductor at low and high frequencies. Series and parallel combination, Q factor. Capacitance and capacitive Reactance, Impedance.

		voltage in electrical circuits to verify Kirchhoff's Law. (05 Hrs) 53. Verify laws of series and parallel circuits with voltage source in different combinations. (05 hrs) 54. Measure the resistance, Voltage, Current through series and parallel connected networks using multi-meter (08 hrs) 55. Identify different inductors and measure the values using LCR meter (05 hrs) 56. Identify the different capacitors and measure capacitance of various capacitors using LCR meter (05 hrs) 57. Identify and test the circuit breaker and other protecting devices. (05 hrs) 58. Dismantle and identify the different parts of a relay. (05 hrs) 59. Connect a timer relay in a circuit and test for its working. (03 hrs) 60. Connect a contactor in a circuit and test for its working. (02 hrs) 61. Construct and test RC time constant circuit. (04 hrs) 62. Construct a RC differentiator circuit and convert triangular wave into square wave. (05 hrs) 63. Construct and test series and parallel resonance circuit (03 hrs)	Types of capacitors, construction, specifications and applications. Dielectric constant. Significance of Series parallel connection of capacitors. Capacitor behaviour with AC and DC. Concept of time constant of a RC circuit. Concept of resonance and its application in RC, RL & RLC series and parallel circuit. Properties of magnets and their materials, preparation of artificial magnets, significance of electro magnetism, types of cores. Relays, types, construction and specifications etc.
14-15	• Assemble simple electronic power supply circuit and test for functioning.	**Power Supply Circuits** 64. Identify different types of diodes, diode modules and their specifications. (05 hrs) 65. Test the given diode using multi-meter and determine forward to reverse resistance ratio. (05 hrs) 66. Measure the voltage and	Semiconductor materials, components, number coding for different electronic components such as Diodes and Zeners etc. PN Junction, forward and reverse biasing of diodes. Interpretation of diode specifications.

		current through a diode in a circuit and verify its forward characteristic. (08 hrs) 67. Identify different types of transformers and test. (03 hrs) 68. Identify the primary and secondary transformer windings and test the polarity (02 hrs) 69. Construct and test a half wave, full wave and Bridge rectifier circuit. (10 hrs) 70. Measure ripple voltage, ripple frequency and ripple factor of rectifiers for different load and filter capacitors. (05 hrs) 71. Identify and test Zener diode. (02 hrs) 72. Construct and test Zener based voltage regulator circuit.(05 hrs) 73. Calculate the percentage regulation of regulated power supply. (05 hrs)	Forward current and reverse voltage. Packing styles of diodes. Different diodes, Rectifier configurations, their efficiencies, Filter components and their role in reducing ripple. Working principles of Zener diode, varactor diode, their specifications and applications. Working principle of a transformer, construction, Specifications and types of cores used. Step-up, Step down and isolation transformers with applications. Losses in Transformers. Phase angle, phase relations, active and reactive power, power factor and its importance.
16-20	• Install, configure, interconnect given computer system(s) and demonstrate & utilize application packages for different application.	**Computer Hardware, OS, MS office and Networking** 74. Identify various indicators, cables, connectors and ports on the computer cabinet. (05 hrs) 75. Demonstrate various parts of the system unit and motherboard components. (05 hrs) 76. Identify various computer peripherals and connect it to the system. (05 hrs) 77. Disable certain functionality by disconnecting the concerned cables SATA/ PATA. (05 hrs) 78. Replace the CMOS battery and extend a memory module. (05 hrs) 79. Test and Replace the SMPS (05 hrs) 80. Replace the given DVD and HDD on the system (05 hrs)	Basic blocks of a computer, Components of desktop and motherboard. Hardware and software, I/O devices, and their working. Different types of printers, HDD, DVD. Various ports in the computer. Windows OS MS widows: Starting windows and its operation, file management using explorer, Display & sound properties, screen savers, font management, installation of program, setting and using of control panel, application of accessories, various IT tools and applications. Concept of word processing: MS

		81. Dismantle and assemble the desktop computer system. (10 hrs) 82. Boot the system from different options. (05 hrs) 83. Install OS in a desktop computer. (05 hrs) 84. Install a Printer driver software and test for print outs. (05 hrs) 85. Install antivirus software, scan the system and explore the options in the antivirus software. (05 hrs) 86. Install MS office software (05 hrs) 87. Create folder and files, draw pictures using paint. (05 hrs) 88. Explore different menu/ tool/ format/ status bars of MS word and practice the options. (08 hrs) 89. Explore different menu/ tool/ format/ status bars of MS excel and practice the options. (07 hrs) 90. Prepare power point presentation on any three known topics with various design, animation and visual effects. (05 hrs) 91. Convert the given PDF File into Word file using suitable software. (05 hrs) 92. Browse search engines, create email accounts, practice sending and receiving of mails and configuration of email clients. (05 hrs) 93. Identify different types of cables and network components e.g. Hub, switch, router, modem etc. (05 hrs) 94. Prepare terminations, make UTP and STP cable connectors and test. (05 hrs)	word – Menu bar, standard tool bar, editing, formatting, printing of document etc. Excel – Worksheet basics, data entry and formulae. Moving data in worksheet using tool bars and menu bars, formatting and calculations, printing worksheet, creating multiple work sheets, creating charts. Introduction to power point Basics of preparing slides, different design aspects of slides, animation with slides etc. Concept of internet, browsers, websites, search engines, email, chatting and messenger service. Downloading the data and program files etc. **Computer Networking:** Network features - Network media Network topologies, protocols- TCP/IP, UDP, FTP, models and types. Specification and standards, types of cables, UTP, STP, Coaxial cables. Network components like hub, Ethernet switch, router, NIC Cards, connectors, media and firewall. Difference between PC & Server.

		95. Connect network connectivity hardware and check for its functioning. (05 hrs) 96. Configure a wireless Wi-Fi network (05 hrs)	
21	• Assemble simple electronic power supply circuit and test for functioning.	**IC Regulators** 97. Construct and test a +12V fixed voltage regulator. (05 hrs) 98. Identify the different types of fixed +ve and –ve regulator ICs and the different current ratings (78/79 series) (05 hrs) 99. Identify different heat sinks for IC based regulators. (02 hrs) 100. Observe the output voltage of different IC 723 metal/ plastic type and IC 78540 regulators by varying the input voltage with fixed load (08 hrs) 101. Construct and test a 1.2V – 30V variable output regulated power supply using IC LM317T. (05 hrs)	Regulated Power supply using 78XX series, 79XX series. Op-amp regulator, 723 regulator, (Transistorized & IC based). Voltage regulation, error correction and amplification etc.

22-24	• Plan and carry out the selection of a project, assemble the project and evaluate performance for a domestic/commercial application.	Make simple project applications using ICs, Zener diode, transformer and other discrete components.
		  a) Full wave bridge rectifier with indicator.
		  b) Modular Rectifiers.
		  c) Transformer less 12V dual power supply.
		  d) Half wave dual power supply with zener diode.
		  e) Versatile regulated power supply.
		  f) AC/DC voltage tester.
		(Instructor will pick up any five of the project for implementation)
			Discussion on the identified projects with respect to data of the concerned ICs, components used in the project.

25	**Revision**		
26	**Examination**		

	SYLLABUS FOR MECHANIC CONSUMER ELECTRONIC APPLIANCESTRADE		
	SECOND SEMESTER – 06 Months		
Week No.	**Learning Outcome Reference**	**Professional Skills (Trade Practical) With Indicative Hours**	**Professional Knowledge (Trade Theory)**
27	• Construct, test and verify the input/ output characteristics of various analog circuits.	**Transistor** 102. Identify different transistors with respect to different package type, B-E-C pins, power, switching transistor, heat sinks etc. (05 hrs) 103. Test the condition of a given transistor using ohm-meter. (05 hrs) 104. Measure and plot input and output characteristics of a CE amplifier. (07 hrs) 105. Construct and test a transistor based switching circuit to control a relay (use Relays of different coil voltages and Transistors of different β) (08hrs)	Construction, working of a PNP and NPN transistors, purpose of E, B & C terminals. Significance of α, β and relationship of a transistor. Need for biasing of transistor. VBE, VCB, VCE, IC, IB, Junction Temperature, junction capacitance, frequency of operation. Transistor applications as switch and amplifier. Transistor input and output characteristics. Transistor power ratings & packaging styles and use of different heat sinks.
28-29	• Construct, test and verify the input/ output characteristics of various analog circuits.	**Amplifier** 106. Construct and test fixed-bias, emitter-bias and voltage divider-bias transistor amplifier. (12 hrs) 107. Construct and test a common emitter amplifier with and without bypass capacitors. (05hrs) 108. Construct and test common base amplifier. (05hrs) 109. Construct and test common collector/emitter follower amplifier. (05hrs) 110. Construct and test Darlington amplifier. (05hrs) 111. Construct and test a two stage RC Coupled amplifier. (05 hrs) 112. Construct and test a Class B complementary push pull	Different types of biasing, various configurations of transistor (C-B, C-E & C-C), their characteristics and applications. Transistor biasing circuits and stabilization techniques. Classification of amplifiers according to frequency, mode of operation and methods of coupling. Voltage amplifiers- voltage gain, loading effect. Single stage CE amplifier and CC amplifier. Emitter follower circuit and its advantages. RC coupled amplifier, distinguish between voltage

|		amplifier. (08hrs) 113. Construct and test class C Tuned amplifier. (05hrs)	and power amplifier, Push pull amplifier and class C tuned amplifier. Alpha, beta, voltage gain, Concept of dB dBm. Feedback and its types.
30	• Construct, test and verify the input/ output characteristics of various analog circuits.	**Oscillators** 114. Demonstrate Colpitts oscillator, Hartley oscillator circuits and compare the output frequency of the oscillator by CRO. (07 hrs) 115. Construct and test a RC phase shift oscillator circuits. (05 hrs) 116. Construct and test a crystal oscillator circuits. (05 hrs) 117. Demonstrate Astable, monostable, bistable circuits using transistors. (08 hrs)	Introduction to positive feedback and requisites of an oscillator. Study of Colpitts, Hartley, Crystal and RC oscillators. Types of multi-vibrators and study of circuit diagrams.
31	• Construct, test and verify the input/ output characteristics of various analog circuits.	**Wave shaping circuits** 118. Construct and test shunt clipper. (06 hrs) 119. Construct and test series and dual clipper circuit using diodes. (07 hrs) 120. Construct and test clamper circuit using diodes. (05 hrs) 121. Construct and test Zener diode as a peak clipper. (07 hrs)	Diode shunt clipper circuits, Clamping/limiting circuits and Zener diode as peak clipper, uses their applications.
32-33	• Plan and construct different power electronic circuits and analyse the circuit functioning.	**Power Electronic Components** 122. Identify different power electronic components, their specification and terminals. (06 hrs) 123. Construct and test a FET Amplifier. (06hrs) 124. Construct a test circuit of SCR using UJT triggering. (07hrs) 125. Identify different heat sinks used in SCRs. (03hrs) 126. Construct a snubber circuit for protecting SCR use freewheeling diode to reduce back emf. (07hrs)	Construction of FET& JFET, difference with BJT. Purpose of Gate, Drain and source terminals and voltage/ current relations between them and Impedances between various terminals. Heat Sink-uses &purpose. Suitability of FET amplifiers in measuring device applications. Working of different power electronic components such as SCR, TRIAC, DIAC and UJT.

		127. Construct a jig circuit to test DIAC. (07 hrs) 128. Construct a simple dimmer circuit using TRIAC. (07hrs) 129. Construct UJT based free running oscillator and change its frequency. (07hrs)	
34	• Plan and construct different power electronic circuits and analyse the circuit functioning.	**MOSFET & IGBT** 130. Identify various Power MOSFET by its number and test by using multimeter. (05 hrs) 131. Identify different heat sinks used with various power MOSFET devices. (05hrs) 132. Construct MOSFET test circuit with a small load. (05hrs) 133. Identify IGBTs by their numbers and test by using multimeter. (05 hrs) 134. Construct IGBT test circuit with a small load. (05hrs)	MOSFET, Power MOSFET and IGBT, their types, characteristics, switching speed, power ratings and protection. Differentiate FET with MOSFET. Differentiate Transistor with IGBT.
35	• Select the appropriate opto- electronics components and verify the characteristics in different circuit.	**Opto -Electronics** 135. Test LEDs with DC supply and measure voltage drop and current using multimeter. (05hrs) 136. Construct a circuit to test photo voltaic cell. (05hrs) 137. Construct a circuit to switch a lamp load using photo diode. (05hrs) 138. Construct a circuit to switch a lamp load using photo transistor. (05hrs) 139. Identify opto-coupler input and output terminals and measure the quantum of isolation between input/ output terminals and operate a relay by connecting a switch. (05hrs)	Working and application of LED, IR LEDs, Photo diode, photo transistor, their characteristics and applications. Optical sensor, opto-couplers, circuits with opto-isolators. Characteristics of LASER diodes.

36	• Assemble, test and troubleshoot various digital circuits.	**Basic Gates** 140. Identify different Logic Gates (AND, OR, NAND, NOR, EX-OR, EX-NOR, NOT ICs) by the number printed on them. (06 hrs) 141. Verify the truth tables of all Logic Gate ICs by connecting switches and LEDs. (08 hrs) 142. Construct and verify the truth table of all the gates using NAND and NOR gates. (06 hrs) 143. Use digital IC tester to test the various digital ICs (TTL and CMOS). (05 hrs)	Introduction to Digital Electronics. Difference between analog and digital signals. Logic families and their comparison, logic levels of TTL and CMOS. Number systems (Decimal, binary, octal, Hexadecimal). BCD code, ASCII code and code conversions. Various Logic Gates and their truth tables.
37	• Assemble, test and troubleshoot various digital circuits.	**Combinational Circuits** 144. Construct Half Adder circuit using ICs and verify the truth table. (03hrs) 145. Construct Full adder with two Half adder circuit using ICs and verify the truth table. (05hrs) 146. Construct the adder cum subtractor circuit and verify the result. (05 hrs) 147. Construct and test a 2 to 4 Decoder. (03hrs) 148. Construct and test a 4 to 2 Encoder. (03hrs) 149. Construct and test a 4 to 1 multiplexer. (03hrs) 150. Construct and test a 1 to 4 De multiplexer. (03hrs)	Combinational logic circuits such as Half Adder, Full adder, Parallel Binary adders, 2-bit and four bit full adders. Magnitude comparators. Half adder, full adder ICs and their applications for implementing arithmetic operations. Concept of encoder and decoder. Basic Binary Decoder and four bit binary decoders. Need for multiplexing of data. 1:4 line Multiplexer/De-multiplexer.
38	• Assemble, test and troubleshoot various digital circuits.	**Flip Flops** 151. Identify different Flip-Flop (ICs) by the number printed on them. (05hrs) 152. Construct and test four bit latch using 7475. (05 hrs) 153. Construct and test R-S flip-flop using IC7400 with clock and without clock pulse. (05 hrs) 154. Verify the truth tables of Flip-	Introduction to Flip-Flop. S-R Latch, Gated S-R Latch, D-Latch. Flip-Flop: Basic RS Flip Flop, edge triggered D Flip Flop, JK Flip Flop, T Flip Flop. Master-Slave flip flops and Timing diagrams. Basic flip flop applications like

		Flop ICs (RS, D, T, JK, MSJK) by connecting switches and LEDs. (10 hrs)	data storage, data transfer and frequency division.
39-40	• Simulate and analyze the analog and digital circuits using Electronic simulator software.	**Electronic circuit simulator** 155. Prepare simple digital and electronic circuits using the software. (10 hrs) 156. Simulate and test the prepared digital and analog circuits. (16 hrs) 157. Convert the prepared circuit into a layout diagram.(10 hrs) 158. Prepare simple, power electronic and domestic electronic circuit using simulation software. (14 hrs)	Study the library components available in the circuit simulation software. Various resources of the software.
41-43	• Assemble, test and troubleshoot various digital circuits.	**Counter & shift registers** 159. Construct and test a four bit asynchronous binary counter using 7493 (10hrs) 160. Construct and test 7493 as a modulus-12 counter. (10hrs) 161. Construct and test a four bit Synchronous binary counter using 74163. (10hrs) 162. Construct and test synchronous Decade counter. (05hrs) 163. Construct and test an up/down synchronous decade counter using 74190 and monitor the output on LEDs. (10hrs) 164. Identify and test common anode and common cathode seven segment LED display using multi meter. (05hrs) 165. Display the two digit count value on seven segment display using decoder/driver ICs. (05hrs) 166. Construct a shift register using RS/D/JK flip flop and verify the result. (05hrs) 167. Construct and test four bit	Basics of Counters, types, two bit and three bit Asynchronous binary counters and decade counters with the timing diagrams. 3-bit synchronous counters and synchronous decade counters. Types of seven segment display. BCD display and BCD to decimal decoder. BCD to 7 segment display circuits. Basics of Register, types and application of Registers.

		SIPO register. (05 hrs) 168. Construct and test four bit PIPO register. (05 hrs) 169. Construct and test bidirectional shift registers. (05hrs)	
44-47	• Construct and test different circuits using ICs 741 operational amplifiers & ICs 555 linear integrated circuits and execute the result.	**Op – Amp & Timer 555 Applications** 170. Use analog IC tester to test the various analog ICs. (05 hrs) 171. Construct and test various Op-Amp circuits Inverting, Non-inverting and Summing Amplifiers. (15hrs) 172. Construct and test Differentiator and Integrator (10hrs) 173. Construct and test a zero crossing detector. (05hrs) 174. Construct and test Instrumentation amplifier (10 hrs) 175. Construct and test a Binary weighted and R-2R Ladder type Digital-to-Analog Converters. (15hrs) 176. Construct and test Astable timer circuit using IC 555 (10 hrs) 177. Construct and test mono stable timer circuit using IC 555. (10 hrs) 178. Construct and test VCO (V to F Converter) using IC 555. (10 hrs) 179. Construct and test 555 timers as pulse width modulator (10 hrs)	Block diagram and working of Op-Amp, importance, ideal characteristics, advantages and applications. Schematic diagram of 741, symbol. Non-inverting voltage amplifier, inverting voltage amplifier, summing amplifier, comparator, zero cross detector, differentiator, integrator and instrumentation amplifier, other popular Op-Amps. Block diagram of 555, functional description w.r.t. different configurations of 555 such as monostable, astable and VCO operations for various application.
48-50	• Plan and carry out the selection of a project, assemble the project and evaluate performance for domestic/ commercial	Make simple project applications using ICs, transformer and other discrete components. a) Pencil charger indicator. b) Delayed automatic power on circuit.	Discussion on the identified projects with respect to data of the concerned ICs, components used in the project.

	applications.	c) Neon flasher circuit using IC741. d) UJT act as a relaxation oscillator. e) Up/down synchronous decade counter. f) Test a 4 to 1 multiplexer circuit. g) Dimmer circuit of Light & Fan using DIAC & TRIAC. h) Timer Circuit using IC-555. (Instructor will pick up any five of the projects for implementation)	
51	**Revision**		
52	**Examination**		

	SYLLABUS FOR MECHANIC CONSUMER ELECTRONIC APPLIANCESTRADE		
	THIRD SEMESTER - 06 MONTHS		
Week No.	**Learning Outcome Reference**	**Professional Skills (Trade Practical) With Indicative Hours**	**Professional Knowledge (Trade Theory)**
53	• Measure the various parameters by DSO and execute the result with standard one.	**Digital Storage Oscilloscope** 180. Identify the different front panel control of a DSO. (05 hrs) 181. Measure the amplitude, frequency and time period of typical electronic signals using DSO. (07 hrs) 182. Take a print of a signal from DSO by connecting it to a printer and tally with applied signal. (06 hrs) 183. Construct and test function generator using IC 8038. (07 hrs)	Advantages and features of DSO. Block diagram of Digital storage oscilloscope (DSO)/ CRO and applications. Applications of digital CRO. Block diagram of function generator. Differentiate a CRO with DSO.
54	• Identify, place, solder and desolder and test different SMD discrete components and ICs package with due care and following safety norms using proper tools/setup.	**Basic SMD (2, 3, 4 terminal components)** 184. Identification of 2, 3, 4 terminal SMD components. (05 hrs) 185. De-solder the SMD components from the given PCB. (05 hrs) 186. Solder the SMD components in the same PCB. (05 hrs) 187. Check for cold continuity of PCB. (03 hrs) 188. Identification of loose/dry solder, broken tracks on printed wired assemblies. (07 hrs)	Introduction to SMD technology Identification of 2, 3, 4 terminal SMD components. Advantages of SMD components over conventional lead components. Soldering of SM assemblies - Reflow soldering. Tips for selection of hardware, Inspection of SM.
55-56	• Identify, place, solder and desolder and test different SMD	**SMD Soldering and De-soldering** 189. Identify various connections and setup required for SMD Soldering	Introduction to Surface Mount Technology (SMT). Advantages, Surface Mount

	discrete components and ICs package with due care and following safety norms using proper tools/setup.	station. (05 hrs) 190. Identify crimping tools for various IC packages. (03 hrs) 191. Make the necessary settings on SMD soldering station to de-solder various ICs of different packages (at least four)by choosing proper crimping tools (14 hrs) 192. Make the necessary settings on SMD soldering station to solder various ICs of different packages (at least four) by choosing proper crimping tools (14 hrs) 193. Make the necessary setting rework of defective surface mount component used soldering/de-soldering method. (14 hrs)	components and packages. Introduction to solder paste (flux). Soldering of SM assemblies, reflow soldering. Tips for selection of hardware, Inspection of SM. Identification of Programmable Gate array (PGA) packages. Specification of various tracks, calculation of track width for different current ratings. Cold/ Continuity check of PCBs. Identification of lose/ dry solders, broken tracks on printed wiring assemblies. Introduction to Pick place Machine, Reflow Oven, Preparing stencil& stencil printer
57-58	• Rework on PCB after identifying defects from SMD soldering and de-soldering.	**PCB Rework** 194. Checked and Repair Printed Circuit Boards single, Double layer, and important tests for PCBs. (12 hrs) 195. Inspect soldered joints, detect the defects and test the PCB for rework. (08 hrs) 196. Remove the conformal coatings by different methods. (08 hrs) 197. Perform replacement of coating. (08 hrs) 198. Perform baking and preheating. (08 hrs) 199. Repair solder mask and damage pad. (06 hrs)	Introduction to Static charges, prevention, handling of static sensitive devices, various standards for ESD. Introduction to non-soldering interconnections. Construction of Printed Circuit Boards (single, Double, multi-layer), Important tests for PCBs. Introduction to rework and repair concepts. Repair of damaged track. Repair of damaged pad and plated through hole. Repair of solder mask.
59	• Construct different electrical control circuits and test	**Protection devices** 200. Identify different types of fuses along with fuse	Necessity of fuse, fuse ratings, types of fuses, fuse bases.

	for their proper functioning with due care and safety.	holders, overload (no volt coil), current adjust (Biometric strips to set the current). (09 hrs) 201. Test the given MCBs. (08 hrs) 202. Connect an ELCB and test the leakage of an electrical motor control circuit. (08 hrs)	Single/ three phase MCBs, single phase ELCBs. Types of contactors, relays and working voltages. Contact currents, protection to contactors and high current applications.
60	• Construct different electrical control circuits and test for their proper functioning with due care and safety.	**Electrical control circuits** 203. Measure the coil winding resistance of the given motor. (06 hrs) 204. Prepare the setup of DOL starter and Control an induction motor. (07 hrs) 205. Construct a direction control circuit to change direction of an induction motor. (06 hrs) 206. Connect an overload relay and test for its proper functioning. (06 hrs)	Fundamentals of single phase Induction motors, synchronous speed, slip, rotor frequency. Torque-speed characteristics, Starters used for Induction motors.
61-63	• Prepare, crimp, terminate and test various cables used in different electronics industries.	**Electronic Cables & Connectors** 207. Identify various types of cables viz. RF coaxial feeder, screened cable, ribbon cable, RCA connector cable, digital optical audio, video cable, RJ45, RJ11, Ethernet cable, fiber optic cable splicing, fiber optic cable mechanical splices, insulation, gauge, current capacity, flexibility etc. used in various electronics products, different input output sockets (20 hrs) 208. Identify suitable connectors, solder/crimp/terminate & test the cable sets. (15 hrs) 209. Check the continuity as per	Cable signal diagram conventions Classification of electronic cables as per the application w.r.t. insulation, gauge, current capacity, flexibility etc. Different types of connector & their terminations to the cables. Male/ Female type DB connectors. Ethernet 10 Base cross over cables and pin out assignments, UTP and STP, SCTP, TPC, coaxial, types of fibre optical Cables and Cable trays. Different types of connectors Servo 0.1" connectors, FTP, RCA,BNC,HDMI Audio/video connectors like XLR, RCA (phono), 6.3 mm PHONO, 3.5/ 2.5 mm PHONO, BANTAM, SPEAKON, DIN, mini DIN, RF connectors, USB, Fire wire, SATA

		the marking on the connector for preparing the cable set. (15hrs)	Connectors, VGA, DVI connectors, MIDI and RJ45,RJ11 etc.
		210. Identify and select various connectors and cables inside the CPU cabinet of PC. (15 hrs)	
		211. Identify the suitable connector and cable to connect a computer with a network switch and prepare a cross over cable to connect two network computers. (10 hrs)	
64-66	• Assemble and test a commercial AM/ FM receiver and evaluate performance.	**Communication electronics**	
		212. Modulate and demodulate various signals using AM and FM on the trainer kit and observe waveforms (10 hrs)	Radio Wave Propagation – principle, fading.
			Need for Modulation, types of modulation and demodulation.
		213. Construct and test IC based AM Receiver (10 hrs)	Fundamentals of Antenna, various parameters, types of Antennas & application.
		214. Construct and test IC based FM transmitter (10hrs)	Introduction to AM, FM & PM, SSB-SC & DSB-SC.
		215. Construct and test IC based AM transmitter and test the transmitter power. Calculate the modulation index. (10 hrs)	Block diagram of AM and FM transmitter. FM Generation & Detection. Digital modulation and demodulation techniques, sampling, quantization & encoding.
		216. Dismantle the given FM receiver set and identify different stages (AM section, audio amplifier section etc.) (10 hrs)	Concept of multiplexing and de multiplexing of AM/ FM/ PAM/ PPM/PWM signals.
		217. Modulate two signals using AM kit draw the way from and calculate percentage (%) of modulation. (10 hrs)	*A simple block diagram approach to be adopted for explaining the above mod/demod techniques.*
		218. Modulate and demodulate a signal using PAM, PPM, PWM Techniques (15 hrs)	
67-70	• Test, service and troubleshoot the various components of	**Microcontroller (8051)**	
		219. Identify various ICs & their functions on the given Microcontroller Kit. (08	Introduction Microprocessor &8051Microcontroller,architecture, pin details & the bus system.

different domestic/ industrial programmable systems.	hrs) 220. Identify the address range of RAM & ROM. (08 hrs) 221. Measure the crystal frequency, connect it to the controller. (08 hrs) 222. Identify the port pins of the controller & configure the ports for Input & Output operation. (12 hrs) 223. Use 8051 microcontroller, connect 8 LED to the port, blink the LED with a switch. (14 hrs) 224. Perform the initialization, load & turn on a LED with delay using Timer.(10 hrs) 225. Perform the use of a Timer as an Event counter to count external events. (10 hrs) 226. Demonstrate entering of simple programs, execute & monitor the results. (10 hrs) 227. Perform with 8051 microcontroller assembling language program, check the reading of an input port and sending the received bytes to the output port of the microcontroller, used switches and LCD for the input and output. (20 hrs)	Function of different ICs used in the Microcontroller Kit. Differentiate microcontroller with microprocessor. Interfacing of memory to the microcontroller. Internal hardware resources of microcontroller. I/O port pin configuration. Different variants of 8051 & their resources. Register banks & their functioning. SFRs & their configuration for different applications. Comparative study of 8051 with 8052. Introduction to PIC Architecture.
71-73	• Execute the operation of different process sensors, identify, wire & test various sensors of different industrial processes by selecting appropriate test	**Sensors, Transducers and Applications** 228. Identify sensors used in process industries such as RTDs, Temperature ICs, Thermocouples, proximity switches (inductive, capacitive and photo electric), load cells, strain gauge. LVDT PT 100	Basics of passive and active transducers. Role, selection and characteristics. Sensor voltage and current formats. Thermistors/ Thermocouples - Basic principle, salient features, operating range, composition,

	instruments.	(platinum resistance sensor), water level sensor, thermostat float switch, float valve by their appearance. (15 hrs) 229. Measure temperature of a lit fire using a Thermocouple and record the readings referring to data chart. (15 hrs) 230. Measure temperature of a lit fire using RTD and record the readings referring to data chart (15 hrs) 231. Measure the DC voltage of a LVDT (15 hrs) 232. Detect different objectives using capacitive, inductive and photoelectric proximity sensors (15 hrs)	advantages and disadvantages. Strain gauges/ Load cell – principle, gauge factor, types of strain gauges. Inductive/ capacitive transducers - Principle of operation, advantages and disadvantages. Principle of operation of LVDT, advantages and disadvantages. Proximity sensors – applications, working principles of eddy current, capacitive and inductive proximity sensors

74-76	• Plan and carry out the selection of a project, assemble the project and evaluate performance for domestic/commercial applications.	Make simple project applications using ICs, transformer and other discrete components.
		   a) Electronic code lock.
		   b) Temperature control circuit using a thermostat in an electric circuit.
		   c) AM/FM transmitter circuit.
		   d) Smoke detector.
		   e) Water level sensor.
		   f) Programmable musical bell.
		   g) Laptop Protector.
		   h) Mobile phone charger with Battery Monitor.
		   i) Lead Acid Battery Charger/ Auto Turn-off Battery Charger with Indicator.
		   j) Emergency Light.
		   k) Dancing LEDs.
		(Instructor will pick up any five of the project for
			Discussion on the identified projects with respect to data of the concerned ICs, components used in the project.

		implementation)	
77	**Revision**		
78	**Examination**		

SYLLABUS FOR MECHANIC CONSUMER ELECTRONIC APPLIANCESTRADE			
FOURTH SEMESTER – 06 Months			
Week No.	**Learning Outcome Reference**	**Professional Skills (Trade Practical) With Indicative Hours**	**Professional Knowledge (Trade Theory)**
79	• Prepare fibre optic setup and execute transmission and reception.	**Fiber optic communication** 233. Identify the resources and their need on the given fiber optic trainer kit.(03 hrs) 234. Make optical fiber setup to transmit and receive analog and digital data. (04 hrs) 235. Set up the OFC trainer kit to study AM, FM, PWM modulation and demodulation. (06 hrs) 236. Perform FM modulation and demodulation using OFC trainer kit using audio signal and voice link (04 hrs) 237. Perform PWM modulation and demodulation using OFC trainer kit using audio signal and voice link. (04 hrs) 238. Perform PPM modulation and demodulation using OFC trainer kit using audio signal and voice link (04 hrs)	Introduction to optical fiber, optical connection and various types optical amplifier, its advantages, properties of optic fiber, testing, losses, types of fiber optic cables and specifications. Encoding of light. Fiber optic joints, splicing, testing and the related equipment/ measuring tools. Precautions and safety aspects while handling optical cables.
80-82	• Detect the faults and troubleshoot SMPS, UPS and inverter.	**SMPS and Inverter** 239. Identify the components/devices and draw their corresponding symbols (04 hrs) 240. Dismantle the given stabilizer and find major sections/ ICs components. (06 hrs)	Concept and block diagram of manual, automatic and servo voltage stabilizer, o/p voltage adjustment. Voltage cut-off systems, relays used in stabilizer. Block Diagram of different types of Switch mode power

		241. List the defect and symptom in the faulty SMPS. (05 hrs) 242. Measure/ Monitor major test points of computer SMPS. (08 hrs) 243. Troubleshoot the fault in the given SMPS unit. Rectify the defect and verify the output with load. Record your procedure followed for trouble shooting the defects (10 hrs) 244. Use SMPS used in TVs and PCs for Practice. (06 hrs) 245. Install and test the SMPS in PC (06 hrs) 246. Install and test an inverter. (06 hrs) 247. Troubleshoot the fault in the given inverter unit. Rectify the defects and verify the output with load. (06 hrs) 248. Construct and test IC Based DC-DC converter for different voltages (06 hrs) 249. Construct and test a switching step down regulator using LM2576 (06 hrs) 250. Construct and test a switching step up regulator using MC 34063 (06 hrs)	supplies and their working principles. Various types of chopper circuits. Inverter; principle of operation, block diagram, power rating, change over period. Installation of inverters, protection circuits used in inverters. Battery level, overload, over charging etc. Various faults and its rectification in inverter. Block diagram of DC-DC converters and their working principles.
83-85	• Detect the faults and troubleshoot SMPS, UPS and inverter.	**UPS** 251. Connect battery stack to the UPS. (04 hrs) 252. Identify front panel control & indicators of UPS. (04 hrs) 253. Connect Battery & load to UPS & test on battery mode. (06 hrs)	Concept of uninterrupted power supply. Difference between Inverters and UPS. Basic block diagram of UPS & operating principle. Types of UPS: Offline UPS, On line UPS, Line interactive UPS

		254. Open top cover of a UPS; identify its isolator transformers, the UPS transformer and various circuit boards in UPS. (10 hrs) 255. Identify the various test point and verify the voltages on these (07 hrs) 256. Identify various circuit boards in UPS and monitor voltages at various test points (07 hrs) 257. Perform load test to measure backup time. (07 hrs) 258. Perform all above experiment for three phase UPS. (30 hrs)	& their comparison UPS specifications. Load power factor & types of indications & protections. UPS circuit description and working - controlling circuits, Micro controller circuits, power circuits, charging circuits, alarm circuits, Indicator circuits. Installation of single phase & three phase UPS.
86-90	• Identify, operate various controls, trouble shoot and replace modules of the LCD/LED TV & its remote.	**LCD and LED TV** 259. Identify and operate different Controls on LCD, LED TV (10 hrs) 260. Identify components and different sectors of LCD and LED TV. (20 hrs) 261. Dismantle; identify the parts of the remote control (10 hrs) 262. Dismantle the given LCD/LED TV to find faults with input stages through connectors. (20 hrs) 263. Detect the defect in a LED/LCD TV receiver given to you. Rectify the fault. (25 hrs) 264. Troubleshoot the faults in the given LED/LCD TV receiver. Locate and rectify the faults. (25 hrs) 265. Test LED/LCD TV after troubleshooting the defects. (10 hrs)	Difference between a conventional CTV with LCD & LED TVs. Principle of LCD and LED TV and function of its different section. Basic principle and working of 3D TV. IPS panels and their features. Different types of interfaces like HDMI, USB, RGB etc. TV Remote Control–Types, parts and functions, IR Code transmitter and IR Code receiver. Working principle, operation of remote control. Different adjustments, general faults in remote control.

		266. Identify various connectors and connect the cable operators external decoder (set top box) to the TV. (05 hrs)	
91	Install /configure, various control adjustment of the display, troubleshoot and secure LCD/LED projector.	**LCD/ LED Projector** 267. Identify various front panel controls on the given LCD/LED Projector and operate the projector using them.(05 hrs) 268. Identify rear connectors and terminate them using proper cables to the desktop computer. (04 hrs) 269. Make necessary adjustments of the display using remote. (03 hrs) 270. Dismantle the projector and identify all major functional modules.(05 hrs) 271. Test the healthiness of power supply, exhaust fan etc.(04 hrs) 272. Identify the LCD/LED lamp stack and monitor the necessary voltages. (04 hrs)	Differentiate LCD and LED projectors. Specifications of LED Projector Working principle of LED Projector. Most frequently occurring faults in a LED projector and their remedies.
92	Identify different parts, accessories, selection of site and install, troubleshooting of the DTH.	**DTH System** 273. Identification & use of DTH system assembly.(02hrs) 274. Identification & use of different tools and equipments used in DTH installation procedure & cabling procedure.(02 hrs) 275. Identification of various types of connectors and	Basic satellite communication, Merits& Demerits of satellite communication, applications, types of satellite & its orbits, Satellite Frequency Bands. Basic components of DTH system: PDA, LNBC, Satellite receiver terminal, dish installation aspects, Azimuth & elevation settings of dish/ DTH

		cables.(02 hrs)	receiver. Types of cables used in DZTH system, impedance and specification Multi-dwelling unit design, headed amplifier, line amplifier, cascaded in/out multi-switch, tap, and splitter. Set top box features, block diagram of set top box, I/O ports, Cable modem termination system, software & customer premises equipments.
		276. Connection procedure.(02 hrs)	
		277. Install a DTH system & get a TV station. (03hrs)	
		278. Site selection, installation mounting tracking for azimuth and elevation angles using SAT meter. (04hrs)	
		279. Identify the faults in DTH system & rectify.(04hrs)	
		280. Identification & use of various I/O ports of STB.(02hrs)	
		281. STB connection and first installation. (02hrs)	
		282. Identify the faults in STB & rectify.(02hrs)	
93-94	Dismantle, identify the parts, control circuits, sensors of a various domestic appliances. Estimate and troubleshoot.	**Domestic Appliances**	
		283. Identification & use of controls on touch key pad of Microwave oven.(02 hrs)	Microwave oven: Different types of oven, study the various functions of Oven, Block diagram of microwave oven, Electrical wiring diagram of microwave oven, Microwave generation system-circuit, description & working, working of Power supply.
		284. Dismantle and identification of various parts, wiring, tracing of various controls of Microwave oven.(02 hrs)	
		285. Identify the faults in the given Microwave oven & rectify.(03hrs)	
		286. Dismantle and identification of various parts, sensors, wiring, tracing of various controls, Electronic circuits, in various types of washing M/C. (03 hrs)	Washing M/c: different types of machines, washing techniques, (Block diagram) parts of manual, semi-automatic and fully automatic machines, basic working principle of manual, semi-automatic and fully automatic machines, study the working of motors, different types of timers, power supply circuits.
		287. Identify the faults in the given washing M/C and rectify. (03 hrs)	
		288. Dismantle and identification of various parts, wiring, tracing of	Vacuum cleaner (Block diagram) working principle, main parts of Vacuum cleaner, study of different features of

		various controls, Electronic circuits in various types of Vacuum cleaners. (03 hrs)	the machine, study & working of motor used, Electronic circuit, power supply.
		289. Identify the faults in various types of Vacuum cleaners & rectify.(03hrs)	Various parts & functions of Mixer/Grinder, speed control circuit & auto overload protector.
		290. Dismantle and identification of various parts, wiring, tracing of various controls, Electronic circuits in various types of Mixers/grinders.(02 hrs)	Principle of electric iron, parts of steam iron, thermostat heat controls.
		291. Identify the faults in various types of Mixers/grinders & rectify (03hrs)	Working principal of RO and UV type of water purifiers, Different components of water purifier, consumables required, Most frequently occurring faults and their remedial procedures referring to the manual.
		292. Dismantle and identification of various parts, wiring, tracing of various controls, Electronic circuits in steam Iron (02hrs)	
		293. Identify the faults in steam iron & rectify (03hrs)	Principal of Immersion heater, part of immersion heater, Insulation in Immersion heater.
		294. Identify various components of Electric rice cooker, controls and trace the circuit and rectify the simulated faults.(03hrs)	
		295. Identify various components of Water purifier, mantling and dismantling of water purifier, connection between different parts of water purifier.(02 hrs)	Working principle of Induction cook top, study of different features of machine. Types of induction tubes, study of different component of induction cooktop, Fault identification, Heat sinking in induction cooktop.
		296. Clean and replace the worn out consumable parts following the troubleshooting manual(02 hrs)	
		297. Simulate and rectify the faults. (02 hrs)	
		298. Repeat the above exercise	

		for UV type water purifier.(02 hrs) 299. Dismantle and identify various parts, wiring and connections of immersion heater.(02 hrs) 300. Replacing coil and fixing insulation failure problems. Remove scale formation from heating element.(02hrs) 301. Identify the faults in Induction cooktop and rectify. (02 hrs) 302. Dismantle and identify various parts, wiring and tracing of various controls, Electrical and electronics circuit in Induction cooktop.(02hrs) 303. Replacing the Induction tube (coil) in Induction cooktop.(02 hrs)	
95	Install/configure, various control adjustment of the display, troubleshoot and secure LCD/LED projector/ printer.	**Printers** 304. Identification& use of controls/switches/ sockets of a dot matrix printer. (02 hrs) 305. Identification of internal assembly/ section/parts of DMP. (02 hrs) 306. Testing of the paper sensor, print head coils, home position sensor, print head needle coil & cleaning of ribbon mask, paper feed motor gears, printer head movement gears & print head guide. (03 hrs) 307. Identify the faults in DMP & rectify. (02 hrs) 308. Identification & use of controls/ switches/	Printer & its types, principle, parts, working of dot matrix , inkjet & Laser printer, Advantages, disadvantages of each, comparison between impact &non-impact printers & cables used to connect the various printers o computer.

|			
		sockets of an inkjet printer. (02 hrs) 309. Interconnect printer to computer & perform printer test & cleaning of an ink cartridge. (02 hrs) 310. Identification of internal assembly/ section/parts of an inkjet printer. (02 hrs) 311. Identify the faults of an inkjet printer & rectify. (02 hrs) 312. Identification & use of controls/ switches/ sockets of a Laser printer. (02 hrs) 313. Interconnect printer to computer & perform printer test & cleaning of an ink cartridge. (02 hrs) 314. Identification of internal assembly/ section/parts of Laser printer (02 hrs) 315. Identify the faults of a Laser printer & rectify. (02 hrs)	
96-97	Install a CCTV system and configure the system for surveillance function.	**CCTV** 316. Identification of different CCTV components.(03 hrs) 317. Draw, trace or follow the CCTV setup of any commercial installation.(08 hrs) 318. Identify the strategic locations for the installation of cameras.(08 hrs) 319. Operate and learn the procedure for switching cameras to have different views.(08 hrs) 320. Identification of connectors and sockets used on DVRs.(04 hrs)	Types of cameras and their specifications used in CCTV systems. CCTV setup and its components Working of Digital Video Recorders and types of DVRs

Page			
		321. Test the healthiness cables and connectors.(03 hrs) 322. Connect CCTV Cameras to DVR, Record and Replay.(04 hrs) 323. Dismantle DVR and identify major functional blocks and test for the healthiness.(12 hrs) ***Take the students to any nearby commercial CCTV installation to carry out the above tasks.***	
98-99	Identify, operate various controls play switches, troubleshoot and replace faulty boards of a home theatre and its remote.	**Home theatre** 324. Identification of different parts of home theatre. (05 hrs) 325. Testing of speakers, woofers& tweeters. (10 hrs) 326. Set up of home theatre using specific devices. (10 hrs) 327. Identification of different parts of AV receiver. (10 hrs) 328. Identify the faults in AV receiver & rectify. (15 hrs)	Introduction to home theatre, surround sound system, basic components, block diagram of home theatre & working.
100-102	Plan and carry out the selection of a project, assemble the project and evaluate performance for domestic/commercial applications.	Make simple project applications (any five) using ICs, transformer and other discrete components. a) Solar power inverter b) Remote control for home appliances c) Metal Detector d) Digital video recorder Door Watcher e) Remote Control jammer f) Clap Switch g) Digital Lucky random Number Generator h) Count Down Timer i) Digital Clock	Discussion on the identified projects with respect to data of the concerned ICs, components used in the project.

		j) Even Counter k) Seven Segment LED Display Decoder Drive Circuit	
103	**Revision**		
104	**Examination**		

Note: -

1. *Some of the sample project works (indicative only) are given against each semester.*
2. *The instructor may design their own project and also inputs from local industry may be taken in designing such new project.*
3. *The project should broadly cover maximum skills in the particular trade and must involve some problem solving skill. Emphasis should be on Teamwork: Knowing the power of synergy/ collaboration, work to be assigned to a group (Group of at least 4 trainees). The group should demonstrate Planning, Execution, Contribution and Application of Learning. They need to submit a project report.*
4. *If the instructor feels that for the execution of specific project more time is required than he may plan accordingly to produce components/ sub-assemblies in appropriate time, i.e., may be in the previous semester or during execution of normal trade practical.*

9.1 WORKSHOP CALCULATION SCIENCE & ENGINEERING DRAWING

S No.	Workshop Calculation and Science	Engineering Drawing
First Semester		
1.	**Unit**: Systems of unit- FPS, CGS, MKS/SI unit, unit of length, Mass and time, Conversion of units	Engineering Drawing: Introduction and its importance - Relationship to other technical drawing types - Conventions - Viewing of engineering drawing sheets - Method of Folding of printed Drawing Sheet as per BIS SP:46-2003
2.	**Fractions**: Fractions, Decimal fraction, L.C.M., H.C.F., Multiplication and Division of Fractions and Decimals, conversion of Fraction to Decimal and vice versa. Simple problems using a scientific calculator.	Drawing Instruments: their Standard and uses - Drawing board, T-Square, Drafter (Drafting M/c), Set Squares, Protractor, Drawing Instrument Box (Compass, Dividers, Scale, Diagonal Scales etc.), Pencils of different Grades, Drawing pins / Clips.
3.	**Square Root**: Square and Square Root, method of finding out square roots, Simple problem using a calculator.	Lines: - Definition, types and applications in Drawing as per BIS SP:46-2003 - Classification of lines (Hidden, centre, construction, Extension, Dimension, Section) - Drawing lines of given length (Straight, curved) - Drawing of parallel lines, perpendicular line - Methods of Division of line segment
4.	**Ratio & Proportion**: Simple calculation on related problems.	Drawing of Geometrical Figures: Definition, nomenclature and practice of - Angle: Measurement and its types, method of bisecting. - Triangle -different types - Rectangle, Square, Rhombus,

		- Parallelogram. - Circle and its elements.
5.	**Percentage**: Introduction, Simple calculation. Changing percentage to decimal and fraction and vice-versa.	Lettering and Numbering as per BIS SP46-2003: - Single Stroke, Double Stroke, inclined, Upper case and Lower case.
6.	**Material Science**: Properties -Physical & Mechanical, Types–Ferrous & Non-Ferrous, difference between Ferrous and Non-Ferrous metals, introduction of Iron, Cast Iron, Wrought Iron, Steel, difference between Iron and Steel, Alloy steel, carbon steel, stainless steel, Non-Ferrous metals, Non-Ferrous Alloys.	Dimensioning: - Definition, types and methods of dimensioning (functional, non-functional and auxiliary) - Types of arrowhead - Leader Line with text
7.	**Mass, Weight and Density**: Mass, Unit of Mass, Weight, difference between mass and weight, Density, unit of density, specific gravity of metals.	Freehand drawing of: - Lines, polygons, ellipse, etc. - Geometrical figures and blocks with dimension - Transferring measurement from the given object to the free hand sketches.
8.	**Speed and Velocity**: Rest and motion, speed, velocity, difference between speed and velocity, acceleration, retardation, equations of motions, simple related problems.	Sizes and Layout of Drawing Sheets: - Basic principle of Sheet Size - Designation of sizes - Selection of sizes - Title Block, its position and content - Borders and Frames (Orientation marks and graduations) - Grid Reference - Item Reference on Drawing Sheet (Item List)
9.	**Work, Power and Energy**: Work, unit of work, power, unit of power, Horsepower of engines, mechanical efficiency, energy, use of energy, potential and kinetic energy, examples of potential energy and kinetic energy.	Method of presentation of Engineering Drawing: - Pictorial View - Orthogonal View - Isometric view
10.	-----	Symbolic Representation (as per BIS SP:46-2003) of: - Fastener (Rivets, Bolts and Nuts) - Bars and profile sections

		- Weld, brazed and soldered joints
		- Electrical and electronics element
		- Piping joints and fittings

Second Semester

S No.	Workshop Calculation and Science	Engineering Drawing
1.	**Algebra**: Addition, Subtraction, Multiplication, Division, Algebraic formula, Linear equations (with two variables).	Construction of Scales and diagonal scale
2.	**Mensuration:** Area and perimeter of square, rectangle, parallelogram, triangle, circle, semi-circle. Volume of solids – cube, cuboids, cylinder and Sphere. Surface area of solids – cube, cuboids, cylinder and Sphere.	Practice of Lettering and Title Block
3.	**Trigonometry:** Trigonometrical ratios, measurement of angles. Trigonometric tables	Dimensioning practice: - Position of dimensioning (unidirectional, aligned, oblique as per BIS SP:46-2003) - Symbols preceding the value of the dimension and dimensional tolerance. - Text of dimension of repeated features, equidistance elements, circumferential objects.
4.	**Heat & Temperature**: Heat and temperature, their units, difference between heat and temperature, boiling point, melting point, scale of temperature, relations between different scale of temperature, Thermometer, promoter, transmission of heat, conduction, convection, radiation.	Construction of Geometrical Drawing Figures: - Different Polygons and their values of included angles. Inscribed and Circumscribed polygons. - Conic Sections (Ellipse& Parabola)
5.	**Basic Electricity**: Introduction, use of electricity, how electricity is produced, Types of current_ AC, DC, their	Drawing of Solid figures (Cube, Cuboids, Cone, Prism, Pyramid, Frustum of Cone and Pyramid)

	comparison, voltage, resistance, their units. Conductor, insulator, Types of connections– series, parallel, electric power, Horsepower, energy, unit of electrical energy.	with dimensions.
6.	**Levers and Simple Machines:** Levers and its types. Simple Machines, Effort and Load, Mechanical Advantage, Velocity Ratio, Efficiency of machine, Relationship between Efficiency, velocity ratio and Mechanical Advantage.	Free Hand sketch of hand tools and measuring tools used in the respective trades.
7.	–	Projections: - Concept of axes plane and quadrant - Orthographic projections - Method of first angle and third angle projections (definition and difference) - Symbol of 1st angle and 3rd angle projection as per IS specification
8.	–	Drawing of Orthographic projection from isometric/3D view of blocks
9.	–	Orthographic Drawing of simple fastener (Rivet, Bolts, Nuts & Screw)
10.	–	Drawing details of two simple mating blocks and assembled view.

Third Semester		
S No.	Workshop Calculation and Science	Engineering Drawing
1.	**Elasticity:** Stress, strain, Modulus of elasticity, elastic limit, Hooks law, young's modulus.	**CRO:** Block diagram of Cathode Ray Oscilloscope (CRO). Block diagram of Digital storage Oscilloscope (DSO). Front panel view of CRO & DSO.
2.	**Material:** Introduction, types and properties. Uses of Conducting, Semi-conducting and insulating materials.	**Surface Mounting devices (SMD):** Front panel view of SMD station. IC package of SMD. Freehand drawing of Logic gates and circuits.
3.	**Magnetism:** Magnetic material, magnetic field, flux density, magnetic moment, m.m.f. Reluctance, permeability, susceptibility, electromagnet, solenoid and its practical applications.	**Electrical Protective Devices:** Symbol of MCB (Miniature Circuit Breaker), ELCB (Earth Leakage Circuit Breaker), DOL starter, Relays.
4.	**Pressure:** Pneumatic pressure, PSI, bar, atmospheric pressure, pressure gauge and absolute pressure, Heat treatment process.	**Microcontroller:** Block diagram of 8051. Pin configuration of 8051.
5.	**Indices:** Laws of indices related problems. **Quadratic Equation:** Introduction, solution of simple Quadratic equation and related problems.	**Modulation:** Block diagram of super Heterodyne Radio Receiver. Block diagram of AM and FM receiver. Sketches of analog and digital modulation waveforms
6.	Solution of simple A.C. Circuit with R.L.C. Calculation of power factor, etc.	**Generator:** Front panel control for function Generator, IC tester, power supply, Remote control, In plane switching
7.	**A.C Waveform Calculation:** Calculation of r.m.s, average, instantaneous value, peak value. Peak to peak value, frequency and wavelength calculation and their relationship	-----
8.	**Series And Parallel Connection of Electrical and Electronic components:** 1. Calculation Series and parallel connection of Resistors. 2. Calculation Series and parallel connection of Capacitors. 3. Calculation Series and parallel	-----

	connection of Inductors. 4. Calculation Series and parallel connection of Batteries. Conversion of power flow to H.P. Calculation of KVA.	

Fourth Semester

S No.	Workshop Calculation and Science	Engineering Drawing
1.	**Power supply:** Calculation of SMPS, regulation, Calculation of load and wattage for selection of UPS, calculate of back up time of Battery related to UPS and Load, calculate of voltage regulation, firing angle calculation of ripple factor, voltage regulation of DC voltage. Calculate the regulation of solar power.	**Symbol of electronic component:** A. Thermocouple B. Strain Gauge C. LVDT (Linear variable differential transformer) D. Proximity Sensor E. Free hand sketches of computer ports
2.	**Motor parameters &calculation:** Speed and frequency calculation of AC motors, D.C motors.	**DTH System:** Block diagram connections of Home system. Direct To Home (DTH).
3.	**Modulation:** AM/FM modulation index calculation, calculation of Bandwidth, Percentage of modulation in FM/AM.	**Cell Phone:** Block diagram of cell phone receiver system.
4.	**Number Systems:** Introduction, Decimal, Binary, Octal, Hexadecimal, BCD code, ASCII code, Bit, Byte, KB, MB, GB, Conversion, Addition, Subtraction, Multiplication, Division, 1st and 2s complement method, 9s and 10s complement method.	**Power supply:** Block diagram of SMPS. Block diagram of UPS-ONLINE, OFFLINE, LINE INTERACTING.
5.	**Boolean Algebra:** Simplification of Boolean Algebra equations.	**Project related Drawings:** A. Dancing LEDs B. Smoke detector C. Mobile charger D. Metal detector
6.	**Project costing:** Project selection, cost of project, Simple estimation, simple problems on profit and loss , Balance sheet etc.	**Solar power:** Solar power generation block diagram.

7.	Power transmission by shaft, belts and ropes.	**Fiber-optic communication:** Block diagram of fiber-optic communication.
8.	**Friction:** Law of friction, co-efficient of friction, angle of friction, advantage and disadvantage of friction.	
9.	**Force:** Resolution and composition of forces. Representation of forces by vectors, simple problems on lifting tackles like Jib wall, crane solution of problems with the aid of vectors, General condition of equilibrium for series of forces on a body.	
10.	**Gravity:** Centre of gravity, simple experiments, stable, unstable and neutral equilibrium.	
9.2 EMPLOYABILITY SKILLS

CORE SKILL – EMPLOYABILITY SKILL	
First Semester	
1. English Literacy	**Duration : 20 hrs** **Marks : 09**
Pronunciation	Accentuation (mode of pronunciation) on simple words, Diction (use of word and speech)
Functional Grammar	Transformation of sentences, Voice change, Change of tense, Spellings.
Reading	Reading and understanding simple sentences about self, work and environment
Writing	Construction of simple sentences Writing simple English
Speaking/ Spoken English	Speaking with preparation on self, on family, on friends/ classmates, on known people, picture reading, gain confidence through role-playing and discussions on current happening, job description, asking about someone's job, habitual actions. Cardinal (fundamental) numbers, ordinal numbers. Taking messages, passing on messages and filling in message forms, Greeting and introductions, office hospitality, Resumes or curriculum vita essential parts, letters of application reference to previous communication.
2. IT Literacy	**Duration : 20 hrs** **Marks : 09**
Basics of Computer	Introduction, Computer and its applications, Hardware and peripherals, Switching on-Starting and shutting down of the computer.
Computer Operating System	Basics of Operating System, WINDOWS, The user interface of Windows OS, Create, Copy, Move and delete Files and Folders, Use of External memory like pen drive, CD, DVD etc. Use of Common applications.
Word Processing and Worksheet	Basic operating of Word Processing, Creating, Opening and Closing Documents, Use of shortcuts, Creating and Editing of Text,

	Formatting the Text, Insertion &Creation of Tables. Printing document. Basics of Excel worksheet, understanding basic commands, creating simple worksheets, understanding sample worksheets, use of simple formulas and functions, Printing of simple excel sheets.
Computer Networking and Internet	Basic of Computer Networks (using real life examples), Definitions of Local Area Network (LAN), Wide Area Network (WAN), Internet, Concept of Internet (Network of Networks), Meaning of World Wide Web (WWW), Web Browser, WebsSite, Web page and Search Engines. Accessing the Internet using Web Browser, Downloading and Printing Web Pages, Opening an email account and use of email. Social media sites and its implication. Information Security and antivirus tools, Do's and Don'ts in Information Security, Awareness of IT - ACT, types of cyber crimes.
3. Communication Skills	**Duration : 15 hrs** **Marks : 07**
Introduction to Communication Skills	Communication and its importance Principles of effective communication Types of communication - verbal, non-verbal, written, email, talking on phone. Non-verbal communication -characteristics, components-Para-language Body language Barriers to communication and dealing with barriers. Handling nervousness/ discomfort.
Listening Skills	Listening-hearing and listening, effective listening, barriers to effective listening, guidelines for effective listening. Triple- A Listening - Attitude, Attention & Adjustment. Active listening skills.
Motivational Training	Characteristics essential to achieving success. The power of positive attitude. Self awareness Importance of commitment Ethics and values Ways to motivate oneself Personal goal setting and employability planning.
Facing Interviews	Manners, etiquettes, dress code for an interview Do's &don'ts for an interview

Behavioral Skills	Problem solving Confidence building Attitude

Second Semester	

4. Entrepreneurship Skills	**Duration : 15 hrs** **Marks : 06**
Concept of Entrepreneurship	Entrepreneur - Entrepreneurship - Enterprises: Conceptual issue Entrepreneurship vs. management, Entrepreneurial motivation. Performance &record, Role &function of entrepreneurs in relation to the enterprise & relation to the economy, Source of business ideas, Entrepreneurial opportunities, The process of setting up a business.
Project Preparation & Marketing Analysis	Qualities of a good entrepreneur, SWOT and risk analysis. Concept &Application of PLC, Sales &Distribution management. Difference between small scale &large scale business, Market survey, Method of marketing, Publicity and advertisement, Marketing mix.
Institution's Support	Preparation of project. Role of various schemes and institutes for self-employment i.e. DIC, SIDA, SISI, NSIC, SIDO, Idea for financing/ non-financing support agencies to familiarize with the policies / programmes, procedure & the available scheme.
Investment Procurement	Project formation, Feasibility, Legal formalities i.e., Shop act, Estimation &costing, Investment procedure - Loan procurement - Banking processes.

5. Productivity	**Duration : 10 hrs** **Marks : 05**
Benefits	Personal/ Workman - Incentive, Production linked Bonus, Improvement in living standard.
Affecting Factors	Skills, Working aids, Automation, Environment, Motivation - How it improves or slows down productivity.
Comparison with Developed Countries	Comparative productivity in developed countries (viz. Germany, Japan and Australia) in select industries, e.g. Manufacturing, Steel, Mining, Construction etc. Living standards of those countries, wages.
Personal Finance Management	Banking processes, Handling ATM, KYC registration, safe cash handling, Personal risk and insurance.

6. Occupational Safety, Health and Environment Education	**Duration : 15 hrs** **Marks : 06**

Safety & Health	Introduction to occupational safety and health Importance of safety and health at workplace.
Occupational Hazards	Basic hazards, chemical hazards, vibroacoustic hazards, mechanical hazards, electrical hazards, thermal hazards. occupational health, occupational hygiene, occupational diseases/ disorders & its prevention.
Accident &Safety	Basic principles for protective equipment. Accident prevention techniques - control of accidents and safety measures.
First Aid	Care of injured &sick at the workplaces, First-aid &transportation of sick person.
Basic Provisions	Idea of basic provision legislation of India. Safety, health, welfare under legislative of India.
Ecosystem	Introduction to environment. The relationship between society and environment, ecosystem and factors causing imbalance.
Pollution	Pollution and pollutants including liquid, gaseous, solid and hazardous waste.
Energy Conservation	Conservation of energy, re-use and recycle.
Global Warming	Global warming, climate change and ozone layer depletion.
Ground Water	Hydrological cycle, ground and surface water, Conservation and harvesting of water.
Environment	Right attitude towards environment, Maintenance of in-house environment.

7. Labour Welfare Legislation	Duration : 05 hrs Marks : 03
Welfare Acts	Benefits guaranteed under various acts- Factories Act, Apprenticeship Act, Employees State Insurance Act (ESI), Payment Wages Act, Employees Provident Fund Act, The Workmen's Compensation Act.

8. Quality Tools	Duration : 10 hrs Marks : 05
Quality Consciousness	Meaning of quality, Quality characteristic.
Quality Circles	Definition, Advantage of small group activity, objectives of quality

	circle, Roles and function of quality circles in organization, Operation of quality circle. Approaches to starting quality circles, Steps for continuation quality circles.
Quality Management System	Idea of ISO 9000 and BIS systems and its importance in maintaining qualities.
House Keeping	Purpose of housekeeping, Practice of good housekeeping.
Quality Tools	Basic quality tools with a few examples.

ANNEXURE-I

LIST OF TOOLS & EQUIPMENTS			
MECHANIC CONSUMER ELECTRONIC APPLIANCES			
S No.	Name of the Tools and Equipments	Specification	Quantity
TRAINEES TOOL KIT (For each additional unit trainees tool kit s no. 1-12 is required additionally)			
1.	Connecting screwdriver	100 mm	10 nos.
2.	Neon tester 500 V.	500 V	6 nos.
3.	Screw driver set	Set of 7	10 nos.
4.	Insulated combination pliers	150 mm	6 nos.
5.	Insulated side cutting pliers	150mm	8 nos.
6.	Long nose pliers	150mm	6 nos.
7.	Soldering iron	25 Watt, 240 Volt	10 nos.
8.	Electrician knife	100 mm	6 nos.
9.	Tweezers	150 mm	10 nos.
10.	Digital Multi-meter	(3 3/4 digit),4000 Counts	10 nos.
11.	Soldering Iron Changeable bits	15 Watt, 240 Volt	6 nos.
12.	De- soldering pump electrical heated, manual operators	230 V, 40 W	10 nos.

B. SHOP TOOLS, INSTRUMENTS – For 2 (1+1) units no additional items are required			
Lists of Tools:			
13.	Steel rule graduated both in Metric and English Unit	300 mm,	4 nos.
14.	Precision set of screw drivers	T5, T6, T7	2 nos.
15.	Tweezers – Bend tip		2 nos.
16.	Steel measuring tape	3 meter	4 nos.
17.	Tools makers vice	100mm (clamp)	1 nos.
18.	Tools maker vice	50mm (clamp)	1 nos.
19.	Crimping tool (pliers)	7 in 1	2 nos.
20.	Magneto spanner set	8 Spanners	2 nos.
21.	File flat bastard	200 mm	2 nos.
22.	File flat second cut	200 mm	2 nos.
23.	File flat smooth	200 mm	2 nos.
24.	Plier - Flat Nose	150 mm	4 nos.
25.	Round Nose pliers	100 mm	4 nos.
26.	Scriber straight	150 mm	2 nos.
27.	Hammer ball pen	500 grams	1 no.
28.	Allen key set (Hexagonal -set of 9)	1 - 12 mm, set of 24 Keys	1 no.
29.	Tubular box spanner	Set - 6 - 32 mm	1 set.
30.	Magnifying lenses	75 mm	2 nos.
31.	Continuity tester		6 nos.
32.	Hacksaw frame adjustable	300 mm	2 nos.
33.	Chisel - Cold - Flat	10 mm X 150 mm	1 no.
34.	Scissors	200mm	1 no.
35.	Handsaw 450mm	Hand Saw - 450 mm	1 no.
36.	Hand Drill Machine Electric with Hammer Action	13 mm	2 nos.
37.	First aid kit		1 no.
38.	Bench Vice	Bench Vice - 125 mm	1 no. each
		Bench Vice - 100 mm	
		Bench Vice - 50 mm	
List of Equipments			
39.	Dual DC regulated power	30-0-30 V, 2 Amps	4 nos.

	supply		
40.	DC Regulated Variable Programmable DC Power Supply	0-30V/3A	2 nos.
41.	LCR meter (Digital) Handheld		1 no.
42.	CRO Dual Trace	20 MHz (component testing facilities)	2 nos.
43.	Signal Generator with Digital Display for Frequency Amplitude	10 Hz to 100 Khz, 50/600 Ohms (output impedance)	2 nos.
44.	Battery Charger	0 - 6 - 9 - 12 - 24 , 15 Amps	1 no.
45.	Analog multi-meter		4 nos.
46.	Clamp meter	0 - 10 A	2 nos.
47.	Function generator (DDS Technology (Sine, Square, Triangle, Ramp, Pulse, Serial Data, TTL and Modulation.)	1 mHz -10 MHz Function-Pulse – Modulation Generator with Built-in 40MHz Frequency Counter	2 nos.
48.	Dimmer starter	3 Amps	2 nos.
49.	Autotransformer	15 Amps	2 nos.
50.	Analog Component Trainer	Breadboard for Circuit design with necessary DC /AC power supply: • 8 pin ZIF socket • 16 pin ZIF socket • Resistor bank • Capacitor bank • Potentiometers • Diodes • Zener diodes • NPN Transistor • N-channel MOSFET • LED • Bread board • Ready to use Experimental Boards Lab Manual with list of experiments to perform various experiments	4 nos.
51.	Milli Ammeter (AC)	0 – 200 mA	2 nos.
52.	Milli Ammeter (DC)	0 – 500 mA	2 nos.

53.	Op-Amp trainer	• ±15V, ±12 and +5V fixed DC power supply • 8pin ZIF socket • 16 pin ZIF socket • Resistor bank • Capacitor bank • Potentiometers • Bread board • Built in oscillator : sine, square and tri-anglular waveform	2nos.
54.	Digital IC Trainer	Breadboard for Circuit design with necessary DC Power Supply, Graphical LCD, Clock Frequency 4 different steps, Data Switches: 8 Nos., LED Display: 8 nos. (TTL), Seven Segment Display, Teaching Simulation Software	4 nos.
55.	Digital and Analog IC Tester		1 no. each
56.	Rheostats various values and ratings		2 nos. each
57.	POWER ELECTRONICS TRAINER with at least 6 nos. of application board MOSFET Characteristics SCR Characteristics SCR Lamp Flasher SCR Alarm Circuit Series Inverter Single Phase PWM Inverter		4 nos.
58.	Computers in the assembled form (including cabinet, motherboards, HDD, DVD, SMPS, Monitor, KB, Mouse, LAN card, Blu-Ray drive and player), MS Office education version.		4 nos.
59.	Laptops latest configuration		1 no.
60.	Laser jet Printer		1 no.

61.	INTERNET BROADBAND CONNECTION		1 no.
62.	Electronic circuit simulation software with 6 user licenses	Circuit Design and Simulation Software with PCB Design with Gerber and G Code Generation, 3D View of PCB, Breadboard View, Fault Creation and Simulation.	1 no.
63.	Different types of electronic and electrical cables, connectors, sockets, terminations.		As required
64.	Different types of Analog electronic components, digital ICs, power electronic components, general purpose PCBs, bread board, MCB, ELCB		As required
65.	DSO (colour)	4 Channel , 50MHz Real Time Sampling 1G Samples/Sec, 12 Mpts Memory with PC Interface USB, LAN and math function includes +, -, FFT, differential, integral, abs, log etc.	1 no.
66.	Soldering & De-soldering Station		1 no.
67.	SMD Soldering & De-soldering Station with necessary accessories	**SMD Rework Station** Soldering station: Output Voltage: 26V – 40V AC Temp Range : 50 to 4800 C Desoldering Station: Output Voltage : 24V – 40V AC Vacuum Generator: Vacuum pump: double cylinder type Vacuum Pressure : 80 k Pa Suction flow: 15 L/min. Hot air station: Air flow: 1-9 L/min	2 nos.

		Temp:50 o 500 °C Hand piece of Hot air accessories	
68.	DOL starter	½ hp	1 no.
69.	AC Motor Trainer Kit ¼ HP motor Single Phase Contactors Relays MCB DOL Starter		1 no.
70.	Frequency modulator and Demodulator trainer kit	FM Modulator Type: Reactance Modulator, Varactor Modulator, VCO Based Modulator FM Demodulator type All 5 demodulation techniques Detailed teaching and learning contents through software.	2 nos.
71.	PAM, PPM,PWM trainer kit	With on board function Generator Analog inputs in 4 steps 1-10 Hz, 10-100,100-1Khz, -10khz Analog input voltage variable from 0 to 12 V Built in Square wave pulse	2 nos.
72.	AM/FM Commercial radio receivers		2 nos.
73.	Microcontroller kits (8051) along with programming software (Assembly level Programming)	Core 8051, ready to run programmer for AT89C51/52 & 55, programming modes Key Pad and PC circuits. Detailed learning content through simulation software.	4 nos.
74.	Application kits for Microcontrollers 6 different applications	1. Input Interface : 4x4 Matrix Keypad, ASCII Key PAD, Four Input Switch 2. Display Module 16X2 LCD, Seven Segment, LED Bar Graph 3. ADC/DAC Module with most popular DC/DAC0808	1 set

		4. PC Interface: RS232 & USB 5. Motor Drive: DC, Servo, Stepper 6. DAQ: Data Acquisition to sense different sensors signals	
75.	Sensor Trainer Kit Containing following Sensors 1. Thermocouple 2. RTD 3. Load Cell/ Strain Gauge 4. LVDT 5. Smoke Detector Sensors 6. Speed Sensor 7. Limit Switch 8. Photo sensors 9. Opto-coupler 10. Proximity Sensor	Graphical touch LCD with inbuilt processor for viewing the output waveforms, In built DAQ, and standard processing circuits like Inverting , Non – Inverting , Power, Current , Instrumentation Differential Amplifier, F/V,V/F,V/I,I/V Converter, Sensors: RTD, NTC Thermistor, LM 35 Thermocouple, Gas (Smoke) Sensor, Load cell, LVDT Sensor, Speed Sensor	2 nos.
76.	Various analog and digital ICs useful for doing project works mentioned in the digital and analog IC applications modules		As required
77.	Different types of electronic and electrical cables, connectors, sockets, terminations.		As required
78.	Fiber-optic communication trainer	Full Duplex Analog & Digital Trans-receiver with 660nm & 950nm, Noise Generator with variable gain, Four Seven Segment Display BER Counter, Eye Pattern.	2 nos.
79.	Seven segment DPM trainer		6 nos.
80.	Precision set of screw drivers	T5, T6, T7	2 nos.
81.	SMPS of different make		4 nos.
82.	UPS trainer	PWM switching technology, Test points to measures the voltages of different sections Overall functioning of UPS Trainer, AVR transformer, UPS	1 no.

		with load condition	
83.	UPS 3 KVA with backup time minimum 30 minutes		1 no.
84.	Allen key screw driver	5 no. of set	1 set
85.	CCTV set up	DVR- Cameras with amplifier set up	2 system
86.	Washing machine	Auto and semi-automatic	1 each
87.	Vacuum cleaner	Portable and industry model	2 nos. (1 each)
88.	Microwave oven	20 liters (two technologies)	1 no. each
89.	Mixer cum grinder		2 nos.
90.	Steam iron automatic	Automatic and automatic with steam	Each 2 nos.
91.	Electric rice cooker		3 nos.
92.	Water purifier	(RO and UV technologies)	1 no.
93.	LCD TV (Trainer kit)	21-inch full HD LCD Color Television should support PAL/ NTSC video formats Complete block diagram of a LCD TV system, Study board indicating various sections of LCD TV along with the test points and switch faults	1 no.
94.	Immersion Heater	2 KVA	4 nos.
95.	Induction cooktop	Induction cook top with following feature: Safety sensor Auto switch-off Auto heat-up Booster Protection against overflows	2 nos.
96.	Printers	DMP, laser, deskjet	1 each
97.	L ED/LCD Projector		1 no.
98.	DTH with accessories		1 set
99.	SAT meter		1 no.
100.	Co- Axial cable cutter		1 no.
101.	LCD TV	21" screen smart TV, with different inputs (HDMI, VGA, component video etc.)	2 nos.
102.	Jacket stripper/ Coring tool for 500 series cable		1 no.

103.	Centre conductor cleaner		1 no.
104.	Universal drop trimmer for RG 6/11 cables		1 no.
105.	F - connector tool for RG 6/11 cables		1 no.
106.	F – connector compression tool for RG 6/11 cables		1 no.
107.	LED TV (Trainer kit)	20-inch full HD LED Color Television, PAL/ NTSC video formats, complete block diagram of a LED TV system, Study board indicating various sections of LED TV along with the test points and switch faults Trouble shooting in different sections.	1 no.
108.	LED TV	21" screen smart TV, with different inputs (HDMI, VGA, component video)	2 nos.
109.	Home theatre system		1 no.
110.	Solar Training Kit/ Simulator	With built in meters for DCV, DCA, AC multifunction Meter (for ACI, ACV, Power, Frequency), Protection Circuits, BS-10 terminals for making the connection, Single/ Dual axis tracking system Charge Controller: PWM based MPPT, Charging Stage: Bulk, Absorptions and Float	1 no.
111.	LED lighting system	Measurement of Power, Voltage, Current, Power Factor and Light output performance of different lighting products like LED, CFL at variable input voltages 0 to 245V variable AC	2 sets

D. Shop Floor Furniture and Materials - For 2 (1+1) units no additional items are required.

112.	Instructor's table		1 no.
113.	Instructor's chair		2 nos.
114.	Metal Rack	100cm x 150cm x 45cm	4 nos.
115.	Lockers with 16 drawers		2 nos.

	standard size		
116.	Steel Almirah	2.5 m x 1.20 m x 0.5 m	2 nos.
117.	Black board/white board	12' x 4'	2 no.(one for lab and one classroom)
118.	Fire Extinguisher		2 nos.
119.	Fire Buckets		2 nos.
120.	Classroom furniture (dual desk)		10 nos.
121.	Lab tables (work bench)		6 nos.
122.	Stools for lab		20 nos.
Note: All the tools and equipment are to be procured as per BIS specification.			

TOOLS & EQUIPMENTS FOR EMPLOYABILITY SKILLS		
S No.	**Name of the Equipment**	**Quantity**
1.	Computer (PC) with latest configurations and Internet connection with standard operating system and standard word processor and worksheet software	10 nos.
2.	UPS – 500Va	10 nos.
3.	Scanner cum Printer	1 no.
4.	Computer Tables	10 nos.
5.	Computer Chairs	20 nos.
6.	LCD Projector	1 no.
7.	White Board 1200mm x 900mm	1 no.
Note: Above Tools & Equipments not required, if Computer LAB is available in the institute.		

FORMAT FOR INTERNAL ASSESSMENT

Name & Address of the Assessor:		Year of Enrollment:
Name & Address of ITI (Govt./Pvt.) :		Date of Assessment:
Name & Address of the Industry:		Assessment location: Industry / ITI
Trade Name:	Semester:	Duration of the Trade/course:
Learning Outcome:		

S No	Candidate Name	Father's/Mother's Name	Safety Consciousness	Workplace Hygiene	Attendance/ Punctuality	Ability to follow Manuals/ Written Instructions	Application of Knowledge	Skills to Handle Tools &Equipment	Economical Use of Materials	Speed in Doing Work	Quality in Workmanship	VIVA	Total Internal Assessment Marks	Result (Y/N)
	Maximum Marks (Total 100 Marks)		15	5	10	5	10	10	5	10	15	15
